### Independent Auditors' Report

#### Report No. 2016/HT-4/VI.28.01

The Shareholders, Boards of Commissioners and Directors

PT Intermedia Capital Tbk

We have audited the accompanying interim consolidated financial statements of PT Intermedia Capital Tbk and its subsidiaries, which comprise the interim consolidated statement of financial position as of March 31, 2016, and the interim consolidated statement of profit or loss and other comprehensive income, changes in equity, and cash flows for the three-month period then ended, and a summary of significant accounting policies and other explanatory information.

# Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of such interim consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of interim consolidated financial statements that are free from material misstatement, whether due to fraud or error.

## Auditors' responsibility

Our responsibility is to express an opinion on such interim consolidated financial statements based on our audit. We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether such interim consolidated financial statements are free from material misstatement.

# Handoko Tomo Samuel Gunawan & Rekan

Suatu audit melibatkan pelaksanaan prosedur untuk memperoleh bukti audit tentang angkaangka dan pengungkapan dalam laporan keuangan. Prosedur yang dipilih bergantung pada pertimbangan auditor, termasuk penilaian atas risiko kesalahan penyajian material dalam laporan keuangan, baik yang disebabkan oleh kecurangan maupun kesalahan. Dalam melakukan penilaian tersebut, auditor mempertimbangkan pengendalian internal yang relevan dengan penyusunan penyajian dan wajar laporan keuangan entitas untuk merancang prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektivitasan pengendalian internal entitas. Suatu audit juga mencakup pengevaluasian atas ketepatan kebijakan akuntansi yang digunakan dan kewajaran estimasi akuntansi yang dibuat oleh manajemen, serta pengevaluasian atas penyajian laporan keuangan secara keseluruhan.

Kami yakin bahwa bukti audit yang telah kami peroleh adalah cukup dan tepat untuk menyediakan suatu basis bagi opini audit kami.

#### Opini

Menurut opini kami; laporan keuangan konsolidasian interim terlampir menyajikan secara wajar, dalam semua hal yang material, posisi keuangan konsolidasian interim PT Intermedia Capital Tbk dan entitas anaknya tanggal 31 Maret 2016, serta kinerja keuangan dan arus kas konsolidasian interim untuk periode tiga bulan yang berakhir pada tanggal tersebut, sesuai dengan Standar Akuntansi Keuangan di Indonesia.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the accompanying interim consolidated financial statements present fairly, in all material respects, the interim consolidated financial position of PT Intermedia Capital Tbk and its subsidiaries as of March 31, 2016, and their interim consolidated financial performance and cash flows for the three-month period then ended, in accordance with Indonesian Financial Accounting Standards.

#### Hal lain

Laporan laba rugi dan penghasilan komprehensif lain, laporan perubahan ekuitas, dan laporan arus kas konsolidasian interim untuk periode tiga bulan yang berakhir pada tanggal 31 Maret 2015, tidak diaudit atau direviu, yang disajikan sebagai angka-angka koresponding terhadap laporan keuangan konsolidasian interim untuk periode tiga bulan yang berakhir pada tanggal 31 Maret 2016, dan oleh karena itu, kami tidak menyatakan suatu pendapat maupun bentuk asurans lainnya atas laporan tersebut.

#### Other Matter

The interim consolidated statements of profit or loss and other comprehensive income, changes in equity, and cash flows for the three-month period ended March 31, 2015, were neither audited nor reviewed, which are presented as corresponding figures to the interim consolidated financial statements for the three-month period ended March 31, 2016, and therefore, we do not express an opinion or any other form of assurance on such statements

Penyisihan atas penurunan nilai piutang dibentuk pada saat terdapat bukti objektif bahwa saldo piutang Kelompok Usaha tidak dapat ditagih.

Besarnya penyisihan merupakan selisih antara nilai aset tercatat dan nilai sekarang dari estimasi arus kas masa depan, didiskontokan dengan tingkat suku bunga efektif. Penurunan nilai aset tercatat dicatat di dalam akun penyisihan dan nilai kerugian diakui di dalam laba atau rugi. Ketika tidak dapat ditagih, piutang dihapuskan bersama dengan penyisihan piutang. Pemulihan nilai setelah penghapusan piutang diakui sebagai penghasilan dalam laba rugi.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

## (5) Financial instruments measured at amortized cost

Amortized cost is computed using the effective interest method less any allowance for impairment. The calculation takes into account any premium or discount on acquisition and includes transaction costs and fees that are integral part of the effective interest rate.

### g. Cash

Cash represents cash on hand and cash in bank which are unrestricted in use.

#### h. Trade and Other Receivables

Receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less any allowance for impairment. An allowance for impairment of receivables is established when there is objective evidence that the outstanding amount of the Group's receivables will not be collected.

The amount of the allowance is the difference between the assets carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The carrying amount of the receivables is reduced through the use of an allowance account, and the amount of the loss is recognized in profit or loss. When a receivable is uncollectible, it is written off against the allowance for impairment of receivables. Subsequent recoveries of amounts previously written off are credited against profit or loss.

### i. Persediaan Materi Program

Persediaan materi program diukur berdasarkan nilai terendah antara nilai perolehan yang belum diamortisasi dengan nilai realisasi neto. Persediaan materi program dengan pembelian secara putus untuk program film, sinetron dan program serial, diamortisasi berdasarkan basis akselerasi selama jumlah penayangan yang diharapkan, sedangkan program dibawah perjanjian lisensi diamortisasi berdasarkan metode garis lurus selama periode lisensi atau berdasarkan jumlah penayangan, mana yang lebih dahulu. Produksi program in-house, infotainment, berita, olahraga dan program talk show, diamortisasi sepenuhnya pada saat ditayangkan. Biava perolehan persediaan materi program yang dijual ditentukan dengan menggunakan metode identifikasi khusus.

Persediaan materi program yang telah habis masa berlakunya tetapi belum ditayangkan serta persediaan materi program yang tidak layak tayang dihapuskan dan dibebankan dalam laba rugi tahun berjalan.

#### j. Biaya Dibayar Dimuka

Biaya dibayar dimuka diamortisasi sesuai masa manfaat masing-masing biaya dengan menggunakan metode garis lurus.

### k. Aset Tetap

Kelompok Usaha telah memilih untuk menggunakan model biaya sebagai kebijakan akuntansi pengukuran aset tetapnya.

Seluruh aset tetap awalnya diakui sebesar biaya perolehan, yang terdiri atas harga perolehan dan biaya-biaya tambahan yang dapat diatribusikan langsung untuk membawa aset ke lokasi dan kondisi yang diinginkan supaya aset tersebut siap digunakan sesuai dengan maksud manajemen.

Setelah pengakuan awal, aset tetap, kecuali tanah, dinyatakan pada biaya perolehan dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai. Penyusutan dihitung dengan metode garis lurus selama umur manfaat aset. Taksiran masa manfaat ekonomis aset sebagai berikut:

#### i. Program Material Inventories

Program material inventories are stated at the lower of unamortized cost or net realizable value. Program material inventories for outright purchased programs such as film programs, sinetron and series programs are amortized based on an accelerated basis over the number of expected telecasts, while programs under license arrangements are amortized based on the straight line method over the years of the related license or number of telecasts, whichever is earlier. In-house production, infotainment, news, sports and talk show programs are amortized in full when aired. Cost of program material inventories sold is determined using the specific identification method.

Expired program inventories that have not been aired and unsuitable program inventories are written off and charged to the current year profit or loss.

#### j. Prepaid Expenses

Prepaid expenses are amortized over the period benefited using the straight-line method.

#### k. Fixed Assets

The Group has chosen the cost model as the accounting policy for its fixed assets measurement.

All fixed assets are initially recognized at cost, which comprises its purchase price and any costs directly attributable in bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Subsequent to initial recognition, fixed assets, except land, are carried at cost less any subsequent accumulated depreciation and impairment losses. Depreciation is calculated on a straight-line basis over the useful lives of the assets. The estimated useful lives of the assets are as follows:

Any gain or loss arising on derecognition of the asset is included in the interim consolidated statement of profit or loss and other comprehensive income in the year the assets is derecognized.

## I. Goodwill

Goodwill yang timbul pada saat kombinasi bisnis diakui sebagai aset pada tanggal diperolehnya pengendalian (tanggal akuisisi). Goodwill diukur sebagai selisih dari imbalan yang dialihkan, jumlah setiap kepentingan nonpengendali pada pihak yang diakuisisi dan dalam hal bisnis kombinasi yang dilakukan secara bertahap pada nilai wajar dari kepentingan ekuitas yang sebelumnya dimiliki pihak pengakuisisi pada pihak yang diakuisisi (jika ada) atas jumlah selisih neto dari aset teridentifikasi yang diperoleh dan liabilitas yang diambil alih pada tanggal akuisisi.

Sesuai dengan ketentuan transisi dari PSAK No. 22 (Revisi 2010), sejak tanggal 1 Januari 2011, Kelompok Usaha:

- a) menghentikan amortisasi goodwill;
- b) mengeliminasi jumlah tercatat akumulasi amortisasi *goodwill* terkait; dan
- c) melakukan uji penurunan nilai atas *goodwill* sesuai dengan PSAK No. 48 (Revisi 2014), "Penurunan Nilai Aset".

Untuk tujuan uji penurunan nilai, goodwill dialokasikan pada setiap unit penghasil kas dari Kelompok Usaha yang diharapkan memberikan manfaat dari sinergi kombinasi bisnis tersebut. Unit penghasil kas yang telah memperoleh alokasi goodwill diuji penurunan nilainya secara tahunan, dan ketika terdapat indikasi bahwa unit tersebut mengalami penurunan nilai. Jika jumlah terpulihkan dari unit penghasil kas kurang dari jumlah tercatatnya, rugi penurunan nilai dialokasikan pertama untuk mengurangi iumlah tercatat aset atas setiap goodwill yang dialokasikan pada unit dan selanjutnya ke aset lainnya dari unit dibagi prorata atas dasar jumlah tercatat setiap aset dalam unit tersebut. Rugi penurunan nilai yang diakui atas goodwill tidak dapat dibalik pada periode berikutnya.

#### l. Goodwill

Goodwill arising from a business combination is recognized as an asset at the date that control is acquired (the acquisition date). Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any noncontrolling interest in the acquiree and in the case of business combination achieved in stages, the fair value of the acquirer's previously held equity interest (if any) in the entity over the net acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

In accordance with the transitional provision of PSAK No. 22 (Revised 2010), starting January 1, 2011, the Group:

- a) ceased the amortization of goodwill;
- b) eliminated the carrying amount of the related accumulated amortization of goodwill; and
- c) performed an impairment test on goodwill in accordance with PSAK No. 48 (Revised 2014), "Impairment of Assets".

For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units expected to benefit from the synergies of the combination. Cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rated on the basis of the carrying amount of each asset in the unit. An impairment loss recognized for goodwill is not reversed in subsequent periods.

### m. Penurunan Nilai Aset Non-Keuangan

Kelompok Usaha menerapkan PSAK No. 48 (Revisi 2014) tentang "Penurunan Nilai Aset". PSAK ini memberikan ketentuan pengungkapan tambahan untuk setiap aset individual (termasuk *goodwill*) atau Unit Penghasil Kas (UPK), yang mana rugi penurunan nilai telah diakui atau dibalik sebalik periode berjalan.

Pada setiap tanggal pelaporan, Kelompok Usaha menilai apakah terdapat indikasi aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, atau jika uji penurunan nilai secara tahunan disyaratkan untuk aset tertentu, maka Kelompok Usaha mengestimasi jumlah terpulihkan aset tersebut.

Jumlah terpulihkan suatu aset atau unit penghasil kas adalah jumlah yang lebih tinggi antara nilai wajar dikurangi biaya untuk menjual dan nilai pakainya. Jika jumlah terpulihkan suatu aset lebih kecil dari nilai tercatatnya, nilai tercatat aset harus diturunkan menjadi sebesar jumlah terpulihkan. Rugi penurunan nilai dan pemulihan rugi penurunan nilai diakui segera dalam laporan laba rugi dan komprehensif lain konsolidasian interim.

Penilaian dilakukan pada setiap akhir tahun pelaporan apakah terdapat indikasi bahwa rugi penurunan nilai yang telah diakui dalam tahun sebelumnya untuk aset selain *goodwill* mungkin tidak ada lagi atau mungkin telah menurun. Jika indikasi dimaksud ditemukan, maka entitas mengestimasi jumlah terpulihkan aset tersebut.

Kerugian penurunan nilai yang telah diakui dalam tahun sebelumnya untuk aset selain goodwill dibalik hanya jika terdapat perubahan asumsi-asumsi yang digunakan untuk menentukan jumlah terpulihkan aset tersebut sejak rugi penurunan nilai terakhir diakui. Dalam hal ini, jumlah tercatat aset dinaikkan ke jumlah terpulihkannya. Pembalikan tersebut dibatasi sehingga jumlah tercatat aset tidak melebihi jumlah terpulihkannya maupun jumlah tercatat, setelah dikurangi penyusutan, seandainya tidak ada rugi penurunan nilai yang telah diakui aset tersebut pada tahun sebelumnya. Pembalikan rugi penurunan nilai diakui dalam laba rugi. Setelah pembalikan tersebut, penyusutan aset tersebut disesuaikan di tahun mendatang untuk mengalokasikan jumlah tercatat aset yang direvisi, dikurangi nilai sisanya, dengan dasar yang sistematis selama sisa umur manfaatnya

### m. Impairment of Non-Financial Assets

The Group applied PSAK No. 48 (Revised 2014) "Impairment of Assets". This PSAK requires additional disclosures for each individual asset (including goodwill) for a Cash-Generating Unit (CGU), for which an impairment loss has been recognized or reversed during the period.

The Group evaluates at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, or when annual impairment testing is required for certain assets, the Group estimates the recoverable amount of the asset.

The recoverable amount of an asset or a cashgenerating unit is the higher of its fair value less costs to sell and its value in use. Whenever the carrying amount of an asset exceeds its recoverable amount, the asset is considered to be impaired and is written down to its recoverable amount. Impairment loss and reversal of an impairment loss are recognized immediately in the interim consolidated statement of profit or loss and other comprehensive income.

An assessment is made at each annual reporting period as to whether there is any indication that previously recognized impairment losses recognized for an asset other than goodwill may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated..

A previously recognized impairment loss for an asset other than goodwill is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Reversal of an impairment loss is recognized in the profit or loss. After such a reversal, the depreciation charge on the said asset is adjusted in future years to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life

### n. Sewa

Penentuan apakah suatu perjanjian merupakan perjanjian sewa atau perjanjian yang mengandung sewa didasarkan atas substansi perjanjian pada tanggal awal sewa dan apakah pemenuhan perjanjian tergantung pada penggunaan suatu aset dan perjanjian tersebut memberikan suatu hak untuk menggunakan aset tersebut.

Kelompok Usaha menerapkan PSAK No. 30 (Revisi 2011), "Sewa", yang mengatur apabila sewa mengandung elemen tanah dan bangunan sekaligus, entitas harus menelaah klasifikasi untuk setiap elemen secara terpisah apakah sebagai sewa pembiayaan atau sewa operasi.

Kelompok Usaha mengklasifikasikan sewa berdasarkan sejauh mana risiko dan manfaat yang terkait dengan kepemilikan aset sewaan berada pada *lessor* atau *lessee*, dan pada substansi transaksi daripada bentuk kontraknya.

Sewa yang mengalihkan secara substansial semua risiko dan manfaat yang terkait dengan kepemilikan aset kepada *lessee* diklasifikasikan sebagai sewa pembiayaan. Pada awal masa sewa, sewa pembiayaan dikapitalisasi sebesar nilai wajar aset sewaan atau sebesar nilai kini dari pembayaran sewa minimum, jika nilai kini lebih rendah dari nilai wajar. Pembayaran sewa minimum dipisahkan antara bagian yang merupakan beban keuangan dan bagian yang merupakan pelunasan liabilitas sehingga menghasilkan suatu tingkat bunga periodik yang konstan atas saldo liabilitas. Beban keuangan dibebankan pada laporan laba rugi dan penghasilan komprehensif lainnya konsolidasian. Aset sewaan yang dimiliki oleh lessee dengan dasar sewa pembiayaan dicatat pada akun aset tetap dan disusutkan sepanjang masa manfaat dari aset sewaan tersebut atau periode masa sewa, mana yang lebih pendek, jika tidak ada kepastian yang memadai bahwa lessee akan mendapatkan hak kepemilikan pada akhir masa sewa.

Sewa yang tidak mengalihkan secara substansial seluruh risiko dan manfaat yang terkait dengan kepemilikan aset diklasifikasikan sebagai sewa operasi. Dengan demikian, pembayaran sewa diakui dalam laba rugi dengan dasar garis lurus (*straightline basis*) selama masa sewa.

### n. Leases

The determination of whether an arrangement is, or contains a lease, is based on the substance of the arrangement at the inception date and whether the fulfillment of the arrangement is dependent on the use of a specific asset and the arrangement conveys a right to use the asset.

The Group adopted PSAK No. 30 (Revised 2011), "Lease", which stipulates when a lease includes both land and building elements, an entity should assess the classification of each element separately whether as a finance or an operating lease.

The Group classifies leases based on the extent to which risks and rewards incidental to the ownership of a leased asset are vested upon the lessor or the lessee, and the substance of the transaction rather than the form of the contract.

Leases that transfer substantially all the risks and benefits incidental to ownership of the leased item to the lessee are classified as finance leases. Finance leases are capitalized at the inception of the lease at the fair value of the leased assets or at the present value of the minimum lease payments if the present value is lower than the fair value. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recorded in the consolidated statement of profit or loss and other comprehensive income. Leased assets held by the lessee under finance leases are included in fixed assets and depreciated over the estimated useful life of the assets or the lease term, whichever is shorter, if there is no reasonable certainty that lessee will obtain ownership by the end of the lease term.

Leases that do not transfer substantially all the risks and benefits incidental to ownership of the leased item are classified as operating leases. Accordingly, the related lease payments are recognized in profit or loss on a straight-line basis over the lease term.

## q. Pajak Penghasilan

Kelompok Usaha menerapkan PSAK No. 46 (Revisi 2014), "Pajak Penghasilan". PSAK ini memberikan tambahan penjelasan untuk asset dan liabilitas pajak tangguhan yang berasal dari aset yang tidak disusutkan yang diukur dengan menggunakan model revaluasi, dan properti investasi yang diukur dengan menggunakan model nilai wajar. PSAK ini juga tidak lagi mengatur mengenai pajak final.

Beban pajak kini ditetapkan berdasarkan taksiran laba kena pajak periode berjalan.

Aset pajak kini dan liabilitas pajak kini dilakukan saling hapus jika dan hanya jika entitas memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus jumlah yang diakui; dan bermaksud untuk menyelesaikan dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan.

### q. Income Taxes

The Group has applied PSAK No. 46 (Revised 2014), "Income Taxes". This PSAK provides additional discussion on deferred tax asset and liability arising from a non-depreciable asset measured using the revaluation model, and from investment property that is measured using the fair value model. This PSAK also removes the criteria of final tax.

Current tax expense is provided based on the estimated taxable income for the period.

Current tax assets and current tax liabilities are offset if, and only if, the entity has a legally enforceable right to set off the recognized amounts; and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax assets and liabilities are recognized for temporary differences between the financial and the tax bases of assets and liabilities at each reporting date. Future tax benefits, such as the carry-forward of unused tax losses, are also recognized to the extent that realization of such benefits is probable.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the end of reporting period.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax item is recognized in correlation to the underlying transaction, either in other comprehensive income or directly in equity.

Jumlah tambahan pokok dan denda pajak berdasarkan Surat Ketetapan Pajak ("SKP") diakui sebagai pendapatan atau beban dalam laba rugi periode/tahun berjalan. Namun jika diajukan upaya penyelesaian selanjutnya, jumlah tersebut ditangguhkan pembebanannya sepanjang memenuhi kriteria pengakuan aset.

## 3. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING

Penyusunan laporan keuangan sesuai dengan Standar Akuntansi Keuangan di Indonesia mewajibkan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah-jumlah yang dilaporkan dalam laporan keuangan. Sehubungan dengan adanya ketidakpastian yang melekat dalam membuat estimasi, hasil sebenarnya yang dilaporkan di masa mendatang dapat berbeda dengan jumlah estimasi yang dibuat.

Kelompok Usaha mendasarkan asumsi dan estimasi pada parameter yang tersedia pada saat laporan keuangan konsolidasian interim disusun. Asumsi dan situasi mengenai perkembangan masa depan mungkin berubah akibat perubahan pasar atau situasi diluar kendali Kelompok Usaha. Perubahan tersebut dicerminkan dalam asumsi terkait pada saat terjadinya.

Pertimbangan, estimasi dan asumsi berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Kelompok Usaha yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian interim:

## Menentukan klasifikasi aset dan liabilitas keuangan

Kelompok Usaha menetapkan klasifikasi atas aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan mempertimbangkan apakah definisi yang ditetapkan PSAK No. 55 (Revisi 2014) dipenuhi. Dengan demikian, aset keuangan dan liabilitas keuangan diakui sesuai dengan kebijakan akuntansi Kelompok Usaha seperti diungkapkan pada Catatan 2f.

## Menentukan nilai wajar dan perhitungan amortisasi biaya perolehan dari instrumen keuangan

Kelompok Usaha mencatat aset dan liabilitas keuangan tertentu pada nilai wajar dan pada biaya perolehan yang diamortisasi, yang mengharuskan penggunaan estimasi akuntansi. Sementara komponen signifikan atas pengukuran nilai wajar dan asumsi yang digunakan dalam perhitungan amortisasi biaya perolehan ditentukan menggunakan bukti objektif yang dapat diverifikasi, jumlah nilai wajar atau amortisasi dapat berbeda bila Kelompok Usaha menggunakan metodologi penilaian atau asumsi yang berbeda. Perubahan tersebut dapat mempengaruhi secara langsung laba rugi Kelompok Usaha (Catatan 28).

## 3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of financial statements, in conformity with Indonesian Financial Accounting Standards, requires management to make judgments, estimations and assumptions that affect amounts reported therein. Due to the inherent uncertainty in making estimates, actual results reported in future periods may differ from those estimates.

The Group based its assumptions and estimates on parameters available when the interim consolidated financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions as they occur.

The following judgments, estimates and assumptions made by management in the process of applying the Group's accounting policies have the most significant effects on the amounts recognized in the interim consolidated financial statements:

## <u>Determining classification of financial assets and financial liabilities</u>

The Group determines the classifications of certain assets and liabilities as financial assets and financial liabilities by judging if they meet the definition set forth in PSAK No. 55 (Revised 2014). Accordingly, the financial assets and financial liabilities are accounted for in accordance with the Group's accounting policies disclosed in Note 2f.

## <u>Determining fair value and calculation of cost</u> amortization of financial instruments

The Group records certain financial assets and liabilities at fair values and at amortized costs, which require the use of accounting estimates. While significant components of fair value measurement and assumptions used in the calculation of cost amortization were determined using verifiable objective evidence, the fair value or amortization amount would differ if the Group utilized different valuation methodology or assumptions. Such changes would directly affect the Group's profit or loss (Note 28).

## 3. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

## Menilai jumlah terpulihkan dari aset keuangan

Kelompok Usaha mengevaluasi akun piutang tertentu yang diketahui bahwa pelanggan tertentu tidak dapat memenuhi kewajiban keuangannya. Dalam hal tersebut, Kelompok Usaha menggunakan pertimbangan, berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas pada jangka waktu hubungan dengan pelanggan dan status kredit dari pelanggan berdasarkan catatan kredit dari pihak ketiga yang tersedia dan faktor pasar yang telah diketahui, untuk mencatat penyisihan spesifik atas pelanggan terhadap jumlah terutang guna mengurangi jumlah piutang yang diharapkan dapat diterima oleh Kelompok Usaha. Penyisihan spesifik ini dievaluasi kembali dan disesuaikan jika tambahan informasi yang diterima mempengaruhi jumlah penyisihan atas penurunan nilai piutang (Catatan 7 dan 8).

## Menentukan amortisasi persediaan materi program

Persediaan materi program dengan pembelian secara putus untuk program film, sinetron dan program serial, diamortisasi berdasarkan basis akselerasi selama jumlah penayangan yang diharapkan, sedangkan program dibawah perjanjian lisensi diamortisasi berdasarkan metode garis lurus selama periode lisensi atau berdasarkan jumlah penayangan, mana yang lebih dahulu. Amortisasi tersebut adalah secara umum diharapkan dalam industri dimana Kelompok Usaha menjalankan bisnisnya. Perubahan dalam belanja iklan, penjualan waktu tayang, peringkat, pangsa pemirsa dan perkembangan teknologi dapat mempengaruhi amortisasi persediaan materi program dan karenanya metode amortisasi tersebut di masa depan mungkin direvisi (Catatan 9).

## Menentukan metode penyusutan dan estimasi umur manfaat aset tetap

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen mengestimasi masa manfaat ekonomis aset tetap antara tiga (3) sampai dengan dua puluh (20) tahun. Ini adalah umur yang secara umum diharapkan dalam industri dimana Kelompok Usaha menjalankan bisnisnya. Perubahan tingkat pemakaian dan perkembangan teknologi dapat mempengaruhi masa manfaat ekonomis dan nilai sisa aset, dan karenanya biaya penyusutan masa depan mungkin direvisi (Catatan 11).

## 3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

## Assessing recoverable amount of financial assets

The Group evaluates specific accounts receivable where it has information that certain customers are unable to meet its financial obligations. In these cases, the Group uses judgment, based on available facts and circumstances, including but not limited to, the length of its relationship with the customer and the customer's current credit status based on any available third party credit reports and known market factors, to record specific provisions for customers against amounts due to reduce its receivable amounts that the Group expects to collect. These specific provisions are re-evaluated and adjusted as additional information received affects the provision for impairment (Notes 7 and 8).

## <u>Determining amortization method of program material inventories</u>

Program material inventories for outright purchased programs such as film programs, sinetrons and series programs are amortized based on an accelerated basis over the number of expected telecasts, while programs under license arrangements are amortized based on the straight-line method over the periods of the related license or number of telecasts, whichever is earlier. The amortization practices are commonly applied in the industry in which the Group conducts its business. Changes in advertising expenditure, sale of airtime, rating, audience share and technological development could impact on the amortization method of program material inventories and therefore, the amortization method could be revised in the future (Note 9).

## <u>Determining depreciation method and estimated useful</u> lives of fixed assets

The costs of fixed assets are depreciated on a straightline basis over their estimated useful lives. Management properly estimates the useful lives of these fixed assets to be within three (3) to twenty (20) years. These are common life expectancies applied in the industry in which the Group conducts its business. Changes in the expected level of usage and technological development could impact on the useful economic lives and residual values of these assets, and therefore future depreciation charges could be revised (Note 11).

## 3. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

## Alokasi harga beli dalam suatu kombinasi bisnis

Akuntansi akuisisi mensyaratkan penggunaan estimasi dan pertimbangan akuntansi untuk mengalokasikan harga perolehan terhadap nilai pasar wajar dari aset dan liabilitas yang teridentifikasi dari entitas yang diakuisisi. Setiap kelebihan dari harga perolehan atas nilai pasar wajar yang diestimasikan dari aset neto yang diakuisisi diakui sebagai *goodwill* dalam laporan posisi keuangan konsolidasian interim. Dengan demikian, pertimbangan yang dibuat dalam mengestimasi nilai pasar wajar yang diatribusikan ke aset dan liabilitas entitas yang diakuisisi dapat mempengaruhi kinerja keuangan Kelompok Usaha secara material (Catatan 2c).

### Menilai jumlah terpulihkan aset non-keuangan

Penyisihan keusangan persediaan materi program diestimasi berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas kepada, kondisi fisik persediaan yang dimiliki, harga jual pasar, dan estimasi biaya penyelesaian. Provisi dievaluasi kembali dan disesuaikan jika terdapat tambahan informasi yang mempengaruhi jumlah yang diestimasi (Catatan 9).

Jumlah terpulihkan aset tetap dan *goodwill* didasarkan pada estimasi dan asumsi khususnya mengenai prospek pasar dan arus kas terkait dengan aset. Estimasi arus kas masa depan mencakup perkiraan mengenai pendapatan masa depan. Setiap perubahan dalam asumsi-asumsi ini mungkin memiliki dampak material terhadap pengukuran jumlah terpulihkan dan bisa mengakibatkan penyesuaian penyisihan penurunan nilai yang sudah dibukukan (Catatan 11, 12 dan 13).

Pada tanggal 31 Maret 2016, Kelompok Usaha menilai bahwa tidak ada indikasi penurunan nilai persediaan materi program, uang muka pembelian peralatan, aset tetap, *goodwill* atau aset tidak lancar lainnya.

## 3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

## Purchase price allocation in a business combination

Accounting for acquisitions requires extensive use of accounting estimates and judgments to allocate the purchase price to the fair market values of the acquiree's identifiable assets and liabilities at the acquisition date. Any excess in the purchase price over the estimated fair market values of the net assets acquired is recorded as goodwill in the interim consolidated financial statements. Thus, the numerous judgments made in estimating the fair market value to be assigned to the acquiree's assets and liabilities can materially affect the Group's financial performance (Note 2c).

#### Assessing recoverable amounts of non-financial assets

Allowance for obsolescence of program material inventories is estimated based on available facts and circumstances, including but not limited to, the inventories, own physical condition, their market selling prices, and estimated costs of completion. The provisions are re-evaluated and adjusted as additional information received affects the amount estimated (Note 9).

The recoverable amounts of fixed assets and goodwill are based on estimates and assumptions regarding in particular the expected market outlook and future cash flows associated with the assets. Estimated future cash flows include estimates of future revenues. Any changes in these assumptions may have a material impact on the measurement of the recoverable amount and could result in adjustments to the provision of impairment already booked (Notes 11, 12 and 13).

As of March 31, 2016, the Group assessed that there was no indication of impairment of its program material inventories, advances for purchase of equipment, fixed assets, goodwill or other non-current assets.

## 3. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

## Estimasi beban pensiun dan imbalan kerja

Penentuan liabilitas dan biaya pensiun dan liabilitas imbalan kerja Kelompok Usaha bergantung pada pemilihan asumsi yang digunakan dalam menghitung jumlah-jumlah tersebut. Asumsi tersebut termasuk antara lain, tingkat diskonto, tingkat kenaikan gaji tahunan, tingkat pengunduran diri karyawan tahunan, tingkat kecacatan, umur pensiun dan tingkat kematian. Sementara Kelompok Usaha berkeyakinan bahwa asumsi tersebut adalah wajar dan sesuai, perbedaan signifikan pada hasil aktual atau perubahan signifikan dalam asumsi yang ditetapkan Kelompok Usaha dapat mempengaruhi secara material liabilitas dan beban imbalan kerja (Catatan 19).

### Menentukan pajak penghasilan

Pertimbangan signifikan dilakukan dalam menentukan provisi atas pajak penghasilan badan. Terdapat transaksi dan perhitungan tertentu yang penentuan pajak akhirnya adalah tidak pasti sepanjang kegiatan usaha normal. Kelompok Usaha mengakui liabilitas yang diharapkan atas pajak penghasilan badan berdasarkan estimasi apakah akan terdapat tambahan pajak penghasilan badan (Catatan 18).

Kelompok Usaha menelaah aset pajak tangguhan pada setiap tanggal pelaporan dan mengurangi nilai tercatat sepanjang tidak ada kemungkinan bahwa laba kena pajak memadai untuk mengkompensasi sebagian atau seluruh aset pajak tangguhan. Kelompok Usaha juga menelaah waktu yang diharapkan dan tarif pajak atas pemulihan perbedaan temporer dan menyesuaikan pengaruh atas pajak tangguhan yang sesuai (Catatan 18).

## Mengevaluasi provisi dan kontinjensi

Kelompok Usaha melakukan pertimbangan untuk membedakan antara provisi dan kontinjensi serta mempersiapkan provisi yang sesuai untuk proses hukum atau kewajiban konstruktif, jika ada, sesuai dengan kebijakan provisinya dan mempertimbangkan risiko dan ketidakpastian yang relevan.

## 3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

## Estimation of pension cost and employee benefits

The determination of the Group's liabilities and cost for pension and employee benefits is dependent on its selection of certain assumptions used in calculating such amounts. These assumptions include among others, discount rates, annual salary increase rate, annual employee turn-over rate, disability rate, retirement age and mortality rate. While the Group believes that its assumptions are reasonable and appropriate, significant differences in the Group's actual results or significant changes in the Group's assumptions may materially affect its employee benefits liability and expenses (Note 19).

### Determining income taxes

Significant judgment is involved in determining provision for corporate income tax. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognizes liabilities for expected corporate income tax issues based on estimates of whether additional corporate income tax will be due (Note 18).

The Group reviews its deferred tax assets at each reporting date and reduces the carrying amount to the extent it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be utilized. The Group also reviews the expected timing and tax rates upon reversal of temporary differences and adjusts the impact of deferred tax accordingly (Note 18).

## Evaluating provisions and contingencies

The Group exercises its judgment to distinguish between provisions and contingencies and sets up appropriate provisions for its legal and constructive obligations, if any, in accordance with its policies on provisions and takes relevant risks and uncertainty into account.

Movements in the allowance for impairment losses on trade receivables, which was based on individual assessment were as follows:

Allowance for impairment loss was recognized for trade receivables which management believes are no longer recovable based on historical experience of the financial condition of the customers.

stated)

Berdasarkan PSAK 60, "Instrumen Keuangan: Pengungkapan", terdapat tingkatan hirarki nilai wajar sebagai berikut:

- a) harga kuotasian (tidak disesuaikan) dalam pasar aktif untuk aset atau liabilitas yang identik (tingkat 1),
- b) input selain harga kuotasian yang termasuk dalam tingkat 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung (misalnya harga) atau secara tidak langsung (misalnya derivasi dari harga pasar) (tingkat 2), dan
- c) input untuk aset atau liabilitas yang bukan berdasarkan data pasar yang dapat diobservasi (input yang tidak dapat diobservasi) (tingkat 3).

Metode dan asumsi berikut ini digunakan untuk mengestimasi nilai wajar untuk setiap kelompok instrumen keuangan sepanjang nilai tersebut dapat diestimasi:

Aset dan liabilitas keuangan jangka pendek:

 Instrumen keuangan jangka pendek dengan jatuh tempo satu tahun atau kurang (kas, piutang usaha, piutang lain-lain, piutang pihak berelasi, aset tidak lancar lainnya, utang usaha, utang lain-lain dan beban masih harus dibayar, liabilitas pembiayaan konsumen, utang pihak berelasi).

Instrumen keuangan ini diperkirakan sebesar nilai tercatat mereka karena sebagian besar merupakan jangka pendek.

Based on PSAK 60, "Financial Instruments: Disclosures", there are levels of fair value hierarchy as follows:

- a) quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1),
- b) inputs other than quoted prices included within level I that are observable for the asset or liability, either directly (as prices) or indirectly (derived from market prices) (level 2), and
- c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to do so:

Short-term financial assets and liabilities:

• Short-term financial instruments with remaining maturities of one year or less (cash, trade receivables, other receivables, due from related party, other current assets, trade payables, other payables, and accrued expenses, consumer finance liabilities, due to related party).

These financial instruments approximate to their carrying amounts largely due to their short-term maturities.

### 28. INSTRUMEN KEUANGAN (Lanjutan)

Aset dan liabilitas keuangan jangka panjang:

• Liabilitas keuangan jangka panjang dengan suku bunga tetap (liabilitas pembiayaan konsumen)

Nilai wajar dari liabilitas keuangan ini ditentukan dengan mendiskontokan arus kas masa datang menggunakan suku bunga yang berlaku dari transaksi pasar yang dapat diamati untuk instrumen dengan persyaratan, risiko kredit dan jatuh tempo yang sama.

 Aset dan liabilitas keuangan jangka panjang lainnya (investasi jangka pendek, piutang dan utang pihak berelasi dan aset tidak lancar lainnya)

Estimasi nilai wajar didasarkan pada nilai diskonto dari arus kas masa datang yang disesuaikan untuk mencerminkan risiko pihak lawan (untuk aset keuangan) dan risiko kredit Kelompok Usaha (untuk liabilitas keuangan) dan menggunakan suku bunga bebas risiko (*risk-free rates*) dari instrumen yang serupa.

Aset tidak lancar lainnya dan investasi jangka pendek yang tidak dikuotasi di harga pasar dan nilai wajarnya tidak dapat diukur secara handal tanpa menimbulkan biaya yang berlebihan, dicatat berdasarkan nilai nominal dikurangi penurunan nilai.

Pada tanggal 31 Maret 2016 dan 31 Desember 2015, Kelompok Usaha tidak memiliki instrumen keuangan yang diukur pada nilai wajar.

### 29. INFORMASI SEGMEN

Kelompok Usaha hanya mempunyai segmen usaha yaitu jasa periklanan dan jasa non iklan yang berlokasi di Jakarta yang dipertimbangkan sebagai segmen primer. Seluruh pendapatan atas jasa tersebut berasal dari wilayah Indonesia sehingga segmen geografis tidak disajikan.

### 28. FINANCIAL INSTRUMENTS (Continued)

Long-term financial assets and liabilities:

• Long-term fixed-rate financial liabilities (consumer finance liabilities)

The fair value of these financial liabilities is determined by discounting future cash flows using applicable rates from observable current market transactions for instruments with similar terms, credit risk and remaining maturities.

 Other long-term financial assets and liabilities (short-term investment, due from and due to related parties and other non-current assets)

Estimated fair value is based on the discounted value of future cash flows adjusted to reflect counterparty risk (for financial assets) and the Group's own credit risk (for financial liabilities) and using risk-free rates for similar instruments.

Other non-current assets and short-term investment that are not stated at quoted market price and whose fair value cannot be reliably measured without incurring excessive costs, are carried at their nominal amounts less any impairment losses.

As of March 31, 2016 and December 31, 2015, the Group had no financial instruments measured at fair value.

### 29. SEGMENT INFORMATION

The Group has only business segments, i.e., advertisement and non-advertisement services located in Jakarta which are considered as primary segments. All revenues from these services are from Indonesia. Therefore, no geographical segments are presented.

Berdasarkan estimasi manajemen sampai dengan tanggal pelaporan berikutnya, kurs Rupiah terhadap Dolar Amerika Serikat dapat melemah/menguat 3% dibandingkan kurs pada tanggal 31 Maret 2016 dan 31 Desember 2015.

Jika pada tanggal 31 Maret 2016 dan 31 Desember 2015, Rupiah melemah/menguat 3% terhadap Dolar Amerika Serikat dengan seluruh variabel lain tetap, maka dampak terhadap laba sebelum beban pajak untuk periode tiga bulan yang berakhir tanggal 31 Maret 2016 dan 2015 akan berupa penurunan/peningkatan masing-masing sekitar Rp1,3 miliar dan Rp1,7 miliar.

### c. Risiko likuiditas

Manajemen risiko likuiditas yang hati-hati termasuk mengatur kas yang cukup untuk menunjang aktivitas usaha secara tepat waktu. Kelompok Usaha mengatur keseimbangan antara kesinambungan kolektibilitas piutang dan fleksibilitas melalui penggunaan pinjaman.

Tabel berikut ini menunjukkan rincian jatuh tempo atas liabilitas keuangan berdasarkan kontraktual arus kas yang tidak didiskontokan (termasuk bunga) pada tanggal-tanggal 31 Maret 2016 dan 2015:

Based on management's estimate, until the next reporting date, the exchange rate of Rupiah against other currencies may weaken/strengthen by 3%, compared to the exchange rate as of March 31, 2016 and December 31, 2015.

If at March 31, 2016 and December 31, 2015, Rupiah had weakened/strengthened by 3% against United States Dollar with all other variables held constant, the effect to income before income tax expense for the three-month period ended March 31, 2016 and 2015 would have been a decrease/increase of approximately Rp1.3 billion and Rp1.7 billion, respectively.

### c. Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash to support business activities on a timely basis. The Group maintains a balance between continuity of accounts receivable collectibility and flexibility through the use of borrowings.

The following tables set forth the details of the maturities of financial liabilities based on remaining contractual undiscounted cash flows (including interest) as of March 31, 2016 and 2015:

### 33. PENYAJIAN KEMBALI DAN REKLASIFIKASI

Pada bulan Desember 2013, Dewan Standar Akuntansi Keuangan menerbitkan PSAK No. 24 (Revisi 2013) "Imbalan Kerja" untuk menggantikan PSAK No. 24 (Revisi 2010) "Imbalan Kerja", yang wajib diterapkan untuk tahun buku yang dimulai pada atau setelah tanggal 1 Januari 2015. Kelompok Usaha mengadopsi standar ini efektif pada tanggal 1 Januari 2015 sesuai dengan ketentuan transisi dari PSAK No. 24.

### 33. RESTATEMENTS AND RECLASSIFICATION

In December 2013, the Indonesian Financial Accounting Standards Board issued PSAK No. 24 (Revised 2013) "Employee Benefits" to replace PSAK No. 24 (Revised 2010) "Employee Benefits", which is required to be applied for financial years beginning on or after January 1, 2015. The Company has adopted this interpretation effective January 1, 2015 in accordance with the transitional provisions of PSAK No. 24.

# 33. PENYAJIAN KEMBALI DAN REKLASIFIKASI (Lanjutan)

Ada tiga perubahan utama pada kebijakan akuntansi Kelompok Usaha sebelumnya akibat penerapan PSAK No. 24 (Revisi 2013), sebagai berikut:

### a. Pengakuan keuntungan (kerugian) aktuaria

Keuntungan dan kerugian aktuaria, efek dari batas atas aset dan pengembalian aktual dari aset program diakui dalam laporan posisi keuangan segera, dengan biaya atau kredit untuk pendapatan komprehensif lain (OCI) pada periode di mana mereka terjadi. Mereka tidak didaur ulang kemudian.

### b. Perhitungan beban pensiun

Beban pensiun yang diakui dalam laporan laba rugi akan dibagi menjadi (i) biaya manfaat yang diperoleh pada periode berjalan (biaya jasa) dan manfaat perubahan (biaya jasa lalu, *settlement* dan *curtailment*); dan (ii) beban atau pendapatan keuangan.

Dalam menghitung hasil yang diharapkan dari aset program, standar sebelumnya menggunakan presentasi hasil yang diharapkan dari aset program, sementara untuk standar yang baru, asumsi berdasarkan tingkat diskonto.

### c. Pengungkapan

Pengungkapan ditingkatkan untuk menjelaskan karakteristik program imbalan dan risiko yang terkait, dan mengidentifikasi dan menjelaskan jumlah yang diakui dalam laporan keuangan. Perubahan tersebut akan memerlukan pengungkapan untuk:

- Penjelasan karakteristik dan risiko yang terkait dengan program imbalan pasti;
- Identifikasi dan penjelasan jumlah dalam laporan keuangan Kelompok Usaha yang timbul dari program imbalan pasti; dan
- Penjelasan bagaimana program imbalan dapat mempengaruhi arus kas masa depan Kelompok Usaha terkait waktu, jumlah dan ketidakpastian.

Perbandingan angka-angka yang dilaporkan sebelumnya dan setelah penyajian kembali pada tanggal 1 Januari 2015 adalah sebagai berikut: PT INTERMEDIA CAPITAL Tbk AND SUBSIDIARIES NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS FOR THE THREE-MONTH PERIOD ENDED MARCH 31, 2016

(Expressed in thousands of Rupiah, unless otherwise stated)

# 33. RESTATEMENTS AND RECLASSIFICATION (Continued)

There are three key changes to the Group's previous accounting policy because of the adoption of PSAK No. 24 (Revised 2013), as follows:

### a. Recognition of actuarial gains (losses)

Actuarial gains and losses, the effect of the asset ceiling and the actual return on plan assets (remeasurements) are recognized in the statements of financial position immediately, with a charge or credit to other comprehensive income (OCI) in the periods in which they occur. They are not recycled subsequently.

### b. Calculation of pension expenses

Pension expense recognized in profit and loss will be split between (i) the cost of benefits accrued in the current period (service cost) and benefit changes (past-service cost, settlements and curtailments); and (ii) finance expense or income.

To calculate expected return on asset, previous standard uses expected return on assets percentage while in the new standard the assumption is based on discount rate.

### c. Disclosure items

Enhanced disclosures are required to explain the characteristics of benefit plans and risks associated with them, and identify and explain the amounts recognized in the financial statements. The amendment will require disclosures to:

- Explain the characteristics of and risks associated with its defined benefit plans;
- Identify and explain the amounts in the Group's financial statements arising from its defined benefit plans; and
- Explain how the defined benefit plans may affect the Group's future cash flows regarding timing, amount and uncertainty.

A comparison of the amounts as previously reported and as restated as of January 1, 2015 is as follows:
