2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

Laporan arus kas konsolidasian disusun dengan menggunakan metode langsung (*direct method*), dan dikelompokkan ke dalam aktivitas operasi, investasi dan pendanaan.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Consolidated financial statements, except for the consolidated statements of cash flows, have been prepared on an accrual basis of accounting using the historical cost concept, except for certain accounts that are measured on the basis described in the related accounting policies.

The consolidated statements of cash flows are prepared using the direct method, and classified into operating, investing and financing activities.

The presentation currency used in the preparation of the consolidated financial statements is the Indonesian Rupiah ("Rp"), which is also the functional currency of the Group.

b. Principles of Consolidation

The consolidated financial statements include all Subsidiaries that are controlled by the Company. Control is presumed to exist when the Company, directly or indirectly, owns more than half of the voting power of an entity unless, in exceptional circumstances, it can be clearly demonstrated that such ownership does not constitute control. Control also exists when the Company owns half or less of the voting power of an entity but there is:

- (a) power over more than half of the voting rights by virtue of an agreement with other investors;
- (b) power to govern the financial and operating policies of the entity under a statute or an agreement;
- (c) power to appoint or remove the majority of the members of the board of directors and board of commissioners or equivalent governing body and control of the entity is by that board or body; or
- (d) power to cast the majority of votes at meetings of the board of directors and board of commissioners or equivalent governing body and control of the entity is by that board or body.

Subsidiaries are consolidated from the date of their acquisition, being the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

Kepentingan nonpengendali mencerminkan bagian atas laba atau rugi dan aset neto yang tidak diatribusikan kepada entitas induk dan disajikan secara terpisah dalam laporan laba rugi komprehensif konsolidasian dan ekuitas pada laporan posisi keuangan konsolidasian, dipisahkan dari ekuitas yang dapat diatribusikan kepada entitas induk.

Seluruh laba rugi komprehensif diatribusikan pada pemilik entitas induk dan pada kepentingan nonpengendali bahkan jika hal ini mengakibatkan kepentingan nonpengendali mempunyai saldo defisit.

Seluruh saldo akun dan transaksi yang material antar entitas yang dikonsolidasi telah dieliminasi.

Perubahan dalam bagian kepemilikan entitas induk pada entitas anak yang tidak mengakibatkan hilangnya pengendalian dicatat sebagai transaksi ekuitas, dimana nilai tercatat kepentingan pengendali dan nonpengendali disesuaikan untuk mencerminkan perubahan bagian relatifnya atas entitas anak. Perbedaan antara jumlah kepentingan nonpengendali disesuaikan dan nilai wajar imbalan yang diberikan atau diterima diakui secara langsung dalam ekuitas dan diatribusikan pada pemilik entitas induk.

Jika entitas induk kehilangan pengendalian atas entitas anak, maka entitas induk menghentikan pengakuan aset (termasuk goodwill), liabilitas dan komponen entitas terkait dengan entitas anak tersebut, dan mengukur setiap sisa investasi pada entitas anak terdahulu pada nilai wajarnya pada tanggal hilangnya pengendalian. Keuntungan atau kerugian yang terjadi diakui sebagai laba rugi yang dapat diatribusikan pada entitas induk.

c. Kombinasi Bisnis

Kombinasi bisnis dicatat dengan metode akuisisi. Selisih lebih nilai agregat dari nilai wajar imbalan dialihkan, jumlah proporsi kepemilikan aset kepentingan nonpengendali atas neto teridentifikasi dari pihak yang diakuisisi, dan nilai wajar kepentingan ekuitas yang sebelumnya dimiliki pihak pengakuisisi, atas nilai wajar aset neto teridentifikasi yang diperoleh diakui sebagai goodwill. Jika terdapat goodwill negatif, maka jumlah tersebut diakui dalam laba rugi. Goodwill tidak diamortisasi dan dilakukan uji penurunan nilai setiap tahun.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Non-controlling interest represents a portion of the profit or loss and net assets not attributable to the parent and is presented separately in the consolidated statement of comprehensive income, and within equity in the consolidated statement of financial position, separate from equity attributable to the parent.

Total comprehensive income is attributed to the owners of the parent company and the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

All significant intercompany transactions and balances have been eliminated.

Changes in a parent's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions, in which the carrying amounts of the controlling and noncontrolling interests are adjusted to reflect the changes in their relative interests in the subsidiary. The difference between the amount by which the noncontrolling interests are adjusted and the fair value of the consideration paid or received shall be recognized directly in equity and attributed to the owners of the parent.

When a parent losses control of a subsidiary it derecognises the assets (including goodwill), liabilities and related equity components of the former subsidiary, and measures any investment retained in the former subsidiary at its fair value at the date when control is lost. The resulting gain or loss is recognized to profit or loss and attributed to the owners of the parent.

c. Business Combination

Business combinations are accounted for using the acquisition method. Any excess of the aggregate of the fair value of the consideration transferred, the non-controlling interest's proportionate share of the acquiree's net identifiable assets, and the fair value of the acquirer's previously held equity interest in the acquiree, over the fair values of the identifiable net assets acquired is recognized as goodwill. In case of negative goodwill, such amount is recognized to profit or loss. Goodwill is not amortized but annually assessed for impairment.

The Group classifies all of its financial assets into loans and receivables category, which are recognized initially at fair value plus directly attributable transaction costs.

Subsequent measurement

Loans and receivables are carried at amortized cost using the effective interest method, less any impairment. Gains and losses are recognized in the consolidated statement of comprehensive income when the loans and receivables are derecognized or impaired, as well as through the amortization process.

Impairment of financial assets

The Group evaluates at each reporting date whether any of its financial assets are impaired. If there is objective evidence of impairment, the amount of loss, which is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not been incurred) discounted at the effective interest rate computed at initial recognition of the asset, shall be recognized to profit or loss.

Penghentian pengakuan aset keuangan

Kelompok Usaha menghentikan pengakuan aset keuangan, jika dan hanya jika: hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir; atau Kelompok Usaha mentransfer hak kontraktual untuk menerima arus kas yang berasal dari aset keuangan; atau tetap memiliki hak kontraktual untuk menerima arus kas yang berasal dari aset keuangan namun juga menanggung kewajiban kontraktual untuk membayar arus kas yang diterima tersebut kepada satu atau lebih pihak penerima melalui suatu kesepakatan yang memenuhi persyaratan tertentu. Ketika Kelompok Usaha mentransfer keuangan, maka Kelompok Usaha mengevaluasi sejauh mana kelompok Usaha tetap memiliki risiko dan manfaat atas kepemilikan aset keuangan tersebut.

(2) Liabilitas keuangan

Pengakuan awal

Kelompok Usaha mengklasifikasikan semua liabilitas keuangannya ke dalam kategori liabilitas keuangan yang diukur pada biaya perolehan diamortisasi, yang pada awalnya sebesar nilai wajar dan termasuk biaya transaksi yang dapat diatribusikan secara langsung.

Pengukuran selanjutnya

Setelah pengakuan awal, liabilitas keuangan dalam kategori ini selanjutnya diukur pada biaya perolehan di amortisasi dengan menggunakan metode suku bunga efektif. Keuntungan dan kerugian diakui dalam laporan laba rugi komprehensif konsolidasian pada saat liabilitas tersebut dihentikan pengakuannya serta melalui proses amortisasi.

Penghentian pengakuan liabilitas keuangan

Kelompok Usaha menghentikan pengakuan liabilitas keuangan jika, dan hanya jika, liabilitas Kelompok Usaha dihentikan, dibatalkan atau kadaluwarsa.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Derecognition of financial assets

The Group shall derecognize financial assets when, and only when: the contractual rights to the cash flows from the financial asset expire; the contractual rights to receive the cash flows of the financial asset are transferred to another entity; or the contractual rights to receive the cash flows of the financial asset are retained but they assume a contractual obligation to pay the cash flows to one or more recipients in an arrangement that meets certain conditions. When the Group transfers a financial asset, it shall evaluate the extent to which it retains the risks and rewards of ownership of the financial asset.

(2) Financial liabilities

Initial recognition

The Group classifies all of its financial liabilities into financial liabilities measured at amortized cost, which are recognized initially at fair value and inclusive of directly attributable transaction costs

Subsequent measurement

After initial recognition, financial liabilities in this category are subsequently measured at amortized cost using the effective interest method. Gains and losses are recognized in the consolidated statement of comprehensive income when the liabilities are derecognized, as well as through the amortization process.

Derecognition of financial liabilities

The Group derecognizes financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired.

(3) Saling hapus instrumen keuangan

Aset keuangan dan liabilitas keuangan saling hapus dan nilai netonya dilaporkan dalam laporan posisi keuangan konsolidasian jika, dan hanya jika, saat ini memiliki hak yang berkekuatan hukum untuk melakukan saling hapus atas jumlah yang telah diakui dan terdapat niat untuk menyelesaikannya secara neto, atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan.

(4) Instrumen keuangan yang diukur pada biaya perolehan diamortisasi

Biaya perolehan diamortisasi dihitung menggunakan metode suku bunga efektif dikurangi dengan penyisihan atas penurunan nilai. Perhitungan tersebut mempertimbangkan premium atau diskonto pada saat perolehan dan termasuk biaya transaksi dan biaya yang merupakan bagian yang tidak terpisahkan dari suku bunga efektif.

g. Kas dan Setara Kas

Kas dan setara kas terdiri dari saldo kas dan bank, serta deposito berjangka yang jatuh tempo dalam waktu tiga (3) bulan atau kurang.

h. Piutang Usaha dan Piutang Lain-lain

Piutang pada awalnya diakui sebesar nilai wajar dan selanjutnya diukur pada biaya perolehan diamortisasi dengan menggunakan metode bunga efektif, dikurangi penyisihan atas penurunan nilai. Penyisihan atas penurunan nilai piutang dibentuk pada saat terdapat bukti obyektif bahwa saldo piutang Kelompok Usaha tidak dapat ditagih.

Besarnya penyisihan merupakan selisih antara nilai aset tercatat dan nilai sekarang dari estimasi arus kas masa depan, didiskontokan dengan tingkat suku bunga efektif. Penurunan nilai aset tercatat dicatat di dalam akun penyisihan dan nilai kerugian diakui di dalam laba atau rugi. Ketika tidak dapat ditagih, piutang dihapuskan bersama dengan penyisihan piutang. Pemulihan nilai setelah penghapusan piutang diakui sebagai penghasilan dalam laba rugi.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

(3) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

(4) Financial instruments measured at amortized cost

Amortized cost is computed using the effective interest method less any allowance for impairment. The calculation takes into account any premium or discount on acquisition and includes transaction costs and fees that are integral part of the effective interest rate.

g. Cash and Cash Equivalent

Cash and cash equivalent consists of cash on hand and in banks, and time deposits with original maturities within three (3) months or less.

h. Trade and Other Receivables

Receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less any allowance for impairment. An allowance for impairment of receivables is established when there is objective evidence that the outstanding amount of the Group's receivables will not be collected.

The amount of the allowance is the difference between the assets carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The carrying amount of the receivables is reduced through the use of an allowance account, and the amount of the loss is recognized in profit or loss. When a receivable is uncollectible, it is written off against the allowance for impairment of receivables. Subsequent recoveries of amounts previously written off are credited against profit or loss.

i. Persediaan Materi Program

Persediaan materi program diukur berdasarkan nilai terendah antara nilai perolehan yang belum diamortisasi dengan nilai realisasi neto. Persediaan materi program dengan pembelian secara putus untuk program film, sinetron dan program serial, diamortisasi berdasarkan basis akselerasi selama jumlah penayangan yang diharapkan, sedangkan program dibawah perjanjian lisensi diamortisasi berdasarkan metode garis lurus selama periode lisensi atau berdasarkan jumlah penayangan, mana yang lebih dahulu. Program produksi sendiri, infotainment, berita, olahraga dan program talk show, diamortisasi sepenuhnya pada saat ditayangkan. Biaya perolehan dari persediaan materi program yang dijual ditentukan dengan menggunakan metode identifikasi khusus.

Persediaan materi program yang telah habis masa berlakunya tetapi belum ditayangkan serta persediaan materi program yang tidak layak tayang dihapuskan dan dibebankan dalam laba atau rugi tahun berjalan.

j. Biaya Dibayar Dimuka

Biaya dibayar dimuka diamortisasi sesuai masa manfaat masing-masing biaya dengan menggunakan metode garis lurus.

k. Investasi pada Entitas Asosiasi

Entitas asosiasi adalah suatu entitas, dimana Kelompok Usaha mempunyai pengaruh signifikan dan bukan merupakan entitas anak (Catatan 2b) maupun bagian partisipasi dalam ventura bersama. Pemilikan, secara langsung maupun tidak langsung, 20% atau lebih hak suara *investee* dianggap pemilikan pengaruh signifikan, kecuali dapat dibuktikan dengan jelas hal yang sebaliknya.

i. Program Material Inventories

Program material inventories are stated at the lower of unamortized cost or net realizable value. Program material inventories for outright purchased programs such as film programs, sinetron and series programs are amortized based on an accelerated basis over the number of expected telecasts, while programs under license arrangements are amortized based on the straight line method over the years of the related license or number of telecasts, whichever is earlier. In-house production, infotainment, news, sports and talk show programs are amortized in full when aired. Cost of program material inventories sold is determined using the specific identification method.

Expired program inventories that have not been aired and unsuitable program inventories are written off and charged to the current year profit or loss.

j. Prepaid Expenses

Prepaid expenses are amortized over the periods benefited using the straight-line method.

k. Investments in Associate

An associate is an entity over which the Group has significant influence and that is neither a subsidiary (Note 2b) nor an interest in a joint venture. Direct or indirect ownership of 20 percent or more of the voting power of an investee is presumed to be an ownership of singnificant influence, unless it can be clearly demonstrated that this is not the case.

2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

Investasi pada entitas asosiasi dicatat dengan menggunakan metode ekuitas, dimana pada awalnya diakui sebesar biaya perolehan. Selanjutnya bagian Kelompok Usaha atas laba rugi entitas asosiasi, setelah penyesuaian yang diperlukan terhadap dampak penyeragaman kebijakan akuntansi dan eliminasi laba atau rugi yang dihasilkan dari transaksi antara Kelompok Usaha dan entitas asosiasi, akan menambah atau mengurangi jumlah tercatat investasi tersebut dan diakui sebagai laba rugi Kelompok Usaha. Penerimaan distribusi dari entitas asosiasi mengurangi nilai tercatat investasi. Penyesuaian terhadap jumlah tercatat tersebut juga diperlukan jika terdapat perubahan dalam proporsi bagian Kelompok Usaha atas entitas asosiasi yang timbul dari pendapatan komprehensif lain dari entitas asosiasi. Bagian Kelompok Usaha atas perubahan tersebut diakui dalam pendapatan komprehensif lain dari Kelompok Usaha.

Goodwill yang terkait dengan akuisisi entitas asosiasi termasuk dalam jumlah tercatat investasi. Jika terdapat goodwill negatif, maka jumlah tersebut diakui di dalam laba rugi. Goodwill tidak diamortisasi dan dilakukan uji penurunan nilai setiap tahun.

Apabila nilai tercatat investasi telah mencapai nilai nol, kerugian selanjutnya akan diakui bila Kelompok Usaha mempunyai komitmen untuk menyediakan bantuan pendanaan atau menjamin kewajiban entitas asosiasi yang bersangkutan.

I. Aset Tetap

Seluruh aset tetap awalnya diakui sebesar biaya perolehan, yang terdiri atas harga perolehan dan biaya-biaya tambahan yang dapat diatribusikan langsung untuk membawa aset ke lokasi dan kondisi yang diinginkan supaya aset tersebut siap digunakan sesuai dengan maksud manajemen.

Setelah pengakuan awal, aset tetap, kecuali tanah, dinyatakan pada biaya perolehan dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai.

Kelompok Usaha telah memilih untuk menggunakan model biaya sebagai kebijakan akuntansi pengukuran aset tetapnya.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Investment in an associate is accounted for using the equity method, under which it is initially recognized at cost. Subsequently the Group's share of the profit or loss of the associate, after any adjustments necessary to give effect to uniform accounting policies and elimination of profits and losses resulting from transactions between the Group and the associate, increases or decreases its carrying amount and is recognized to the Group's profit or loss. Distributions received from the associate reduce the carrying amount of the investment. Adjustments to the carrying amount may also be necessary for changes in the Group's proportionate interest in the associate arising from changes in the associate's other comprehensive income. The Group's share of those changes is recognized in other comprehensive income of the Group.

Goodwill on acquisition of an associate is included in the carrying amount of the investment. In the case of negative goodwill, such amount is recognized to profit or loss. Goodwill is no longer amortized but annually assessed for impairment.

Once an investment's carrying value has been reduced to zero, further losses are taken up if the Group has committed to provide financial support to, or has quaranteed the obligations of the associate.

I. Fixed Assets

All fixed assets are initially recognized at cost, which comprises its purchase price and any costs directly attributable in bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Subsequent to initial recognition, fixed assets, except land, are carried at cost less any subsequent accumulated depreciation and impairment losses.

The Group has chosen the cost model as the accounting policy for its fixed assets measurement.

Beban perbaikan dan pemeliharaan dibebankan pada laba atau rugi pada saat terjadinya; biaya inspeksi penggantian atau yang signifikan dikapitalisasi pada saat terjadinya dan jika besar kemungkinan manfaat ekonomis di masa depan berkenaan dengan aset tersebut akan mengalir ke Kelompok Usaha, dan biaya perolehan aset dapat diukur secara andal. Aset tetap dihentikan pengakuannya pada saat dilepaskan atau ketika tidak ada manfaat ekonomis masa depan yang diharapkan dari penggunaan atau pelepasannya. Laba atau rugi yang timbul dari penghentian pengakuan aset dimasukkan dalam laporan laba rugi komprehensif konsolidasian pada tahun aset tersebut dihentikan pengakuannya.

At the end of each reporting period, the assets' residual values, useful lives and method of depreciation are reviewed, and if appropriate, adjusted prospectively.

Land rights are stated at cost and are not depreciated.

Construction-in-progress is stated at cost and presented as part of "Fixed Assets" in the consolidated statement of financial position. The accumulated costs will be reclassified to the appropriate fixed assets account when construction is completed and the assets are ready for their intended use

The cost of repairs and maintenance is charged to profit or loss as incurred; replacement or major inspection costs are capitalized when incurred if it is probable that future economic benefits associated with the costs will flow to the Group and the cost of the item can be reliably measured. An item of fixed assets is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of fixed assets is included in the consolidated statement of comprehensive income in the year the asset are derecognized.

m. Goodwill

Goodwill yang timbul dari kombinasi bisnis diakui sebagai aset pada tanggal diperolehnya pengendalian (tanggal akuisisi). Goodwill diukur sebagai selisih dari imbalan yang dialihkan, jumlah setiap kepentingan nonpengendali pada pihak yang diakuisisi dan nilai wajar dari kepentingan ekuitas yang sebelumnya dimiliki pihak pengakuisisi pada pihak yang diakuisisi (jika ada) atas jumlah selisih bersih dari aset teridentifikasi yang diperoleh dan liabilitas yang diambil alih pada tanggal akuisisi.

Sesuai dengan ketentuan transisi dari PSAK 22 (Revisi 2010), sejak tanggal 1 Januari 2011, Kelompok Usaha:

- a) menghentikan amortisasi goodwill;
- b) mengeliminasi jumlah tercatat akumulasi amortisasi *qoodwill* terkait; dan
- c) melakukan uji penurunan nilai atas goodwill sesuai dengan PSAK 48 (Revisi 2009), "Penurunan Nilai Aset".

tujuan uji penurunan nilai, goodwill dialokasikan pada setiap unit penghasil kas dari Kelompok Usaha yang diharapkan memberikan manfaat dari sinergi kombinasi bisnis tersebut. Unit penghasil kas yang telah memperoleh alokasi goodwill diuji penurunan nilainya secara tahunan, dan ketika terdapat indikasi bahwa unit tersebut mengalami penurunan nilai. Jika jumlah terpulihkan dari unit penghasil kas kurang dari jumlah tercatatnya, rugi penurunan nilai dialokasikan pertama untuk mengurangi jumlah tercatat aset atas setiap goodwill yang dialokasikan pada unit dan selanjutnya ke aset lainnya dari unit dibagi prorata atas dasar jumlah tercatat setiap aset dalam unit tersebut. Rugi penurunan nilai yang diakui atas goodwill tidak dapat dibalik pada periode berikutnya.

n. Penurunan Nilai Aset Non-Keuangan

Pada setiap tanggal pelaporan Kelompok Usaha menilai apakah terdapat indikasi aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, maka Kelompok Usaha mengestimasi jumlah terpulihkan aset tersebut. Jumlah terpulihkan suatu aset atau unit penghasil kas adalah jumlah yang lebih tinggi antara nilai wajar dikurangi biaya untuk menjual dan nilai pakainya. Jika jumlah terpulihkan suatu aset lebih kecil dari nilai tercatatnya, nilai tercatat aset harus diturunkan menjadi sebesar jumlah terpulihkan. Kerugian penurunan nilai diakui segera dalam laba rugi.

m. Goodwill

STATEMENTS

Goodwill arising in a business combination is recognised as an asset at the date that control is acquired (the acquisition date). Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously held equity interest (if any) in the entity over net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

In accordance with the transitional provision of PSAK 22 (Revised 2010), starting January 1, 2011, the Group:

- a) ceased the amortization of goodwill;
- b) eliminated the carrying amount of the related accumulated amortization of goodwill; and
- c) performed an impairment test on goodwill in accordance with PSAK 48 (Revised 2009), "Impairment of Assets".

For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units expected to benefit from the synergies of the combination. Cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit prorata on the basis of the carrying amount of each asset in the unit. An impairment loss recognized for goodwill is not reversed in subsequent period.

n. Impairment of Non-Financial Assets

The Group evaluates at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the Group estimates the recoverable amount of the asset. The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use. Whenever the carrying amount of an asset exceeds its recoverable amount, the asset is considered to be impaired and is written down to its recoverable amount. The impairment loss is recognized immediately to profit or loss.

o. Sewa

Penentuan apakah suatu perjanjian merupakan perjanjian sewa atau perjanjian yang mengandung sewa didasarkan atas substansi perjanjian pada tanggal awal sewa dan apakah pemenuhan perjanjian tergantung pada penggunaan suatu aset dan perjanjian tersebut memberikan suatu hak untuk menggunakan aset tersebut.

Kelompok Usaha menerapkan PSAK No. 30 (Revisi 2011), "Sewa", yang mengatur apabila sewa mengandung elemen tanah dan bangunan sekaligus, entitas harus menelaah klasifikasi untuk setiap elemen secara terpisah apakah sebagai sewa pembiayaan atau sewa operasi.

Kelompok Usaha mengklasifikasikan sewa berdasarkan sejauh mana risiko dan manfaat yang terkait dengan kepemilikan aset sewaan berada pada *lessor* atau *lesse*, dan pada substansi transaksi daripada bentuk kontraknya.

Sewa yang mengalihkan secara substansial semua risiko dan manfaat yang terkait dengan kepemilikan aset kepada lessee diklasifikasikan sebagai sewa pembiayaan. Pada awal masa sewa. sewa pembiayaan dikapitalisasi sebesar nilai wajar aset sewaan atau sebesar nilai kini dari pembayaran sewa minimum, jika nilai kini lebih rendah dari nilai wajar. Pembayaran sewa minimum dipisahkan antara bagian yang merupakan beban keuangan dan bagian yang merupakan pelunasan liabilitas sehingga menghasilkan suatu tingkat bunga periodik yang konstan atas saldo liabilitas. Beban keuangan dibebankan pada laporan laba rugi komprehensif konsolidasian. Aset sewaan yang dimiliki oleh lessee dengan dasar sewa pembiayaan dicatat pada akun aset tetap dan disusutkan sepanjang masa manfaat dari aset sewaan tersebut atau periode masa sewa, mana yang lebih pendek, jika tidak ada kepastian yang memadai bahwa lessee akan mendapatkan hak kepemilikan pada akhir masa sewa.

Dalam hal transaksi jual dan sewa-balik merupakan sewa pembiayaan maka transaksi tersebut harus diperlakukan sebagai dua transaksi yang terpisah yaitu transaksi penjualan dan transaksi sewa. Selisih lebih hasil penjualan dari nilai tercatat ditangguhkan dan diamortisasi selama masa sewa.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

o. Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at the inception date and whether the fulfillment of the arrangement is dependent on the use of a specific asset and the arrangement conveys a right to use the asset.

The Group adopted PSAK No. 30 (Revised 2011), "Lease", which stipulates when a lease includes both land and building elements, an entity should assess the classification of each element separately whether as a finance or an operating lease.

The Group classifies leases based on the extent to which risks and rewards incidental to the ownership of a leased asset are vested upon the lessor or the lessee, and the substance of the transaction rather than the form of the contract.

Leases that transfer substantially all the risks and benefits incidental to ownership of the leased item to the lessee are classified as finance leases. Finance leases are capitalized at the inception of the lease at the fair value of the leased assets or at the present value of the minimum lease payments if the present value is lower than the fair value. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recorded in the consolidated statement of comprehensive income. Leased assets held by the lessee under finance leases are included in fixed assets and depreciated over the estimated useful life of the assets or the lease term, whichever is shorter, if there is no reasonable certainty that lessee will obtain ownership by the end of the lease term.

In the case of sale and leaseback resulting in a finance lease, this is to be treated as two separate transactions, i.e. sale and lease. The excess of sales proceeds over the carrying amount is deferred and amortized over the lease term.

2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

Sewa yang tidak mengalihkan secara substansial seluruh risiko dan manfaat yang terkait dengan kepemilikan aset diklasifikasikan sebagai sewa operasi. Dengan demikian, pembayaran sewa diakui sebagai beban dengan dasar garis lurus (straight-line basis) selama masa sewa.

p. Pengakuan Pendapatan dan Beban

Pendapatan diakui bila besar kemungkinan manfaat ekonomi akan diperoleh Kelompok Usaha dan jumlahnya dapat diukur secara handal. Pendapatan diukur pada nilai wajar imbalan yang diterima, tidak termasuk diskon, rabat dan pajak penjualan (PPN).

Pendapatan iklan diakui pada saat iklan yang bersangkutan ditayangkan.

Penjualan materi program diakui pada saat penyerahan materi kepada pelanggan atau pada saat produksi selesai, sesuai dengan keadaannya, berdasarkan syarat dalam perjanjian tersebut.

Uang muka yang diterima dari pelanggan dicatat sebagai "Uang Muka Pelanggan" pada laporan posisi keuangan konsolidasian.

Beban diakui pada saat terjadinya (metode akrual).

q. Imbalan Kerja

Kelompok Usaha menentukan liabilitas imbalan kerja sesuai dengan Undang-undang Ketenagakerjaan No.13/2003 ("Undang-undang") tanggal 25 Maret 2003. PSAK No. 24 (Revisi 2010), "Imbalan Kerja" mensyaratkan beban imbalan pascakerja berdasarkan Undang-undang ditentukan dengan menggunakan metode aktuarial "*Projected Unit Credit*".

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Leases that do not transfer substantially all the risks and benefits incidental to ownership of the leased item are classified as operating leases. Accordingly, the related lease payments are recognized in profit or loss on a straightline basis over the lease term.

p. Revenue and Expense Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates and value-added taxes (VAT).

Advertisement revenue is recognized when the advertisement is aired.

Sale of program materials is recognized upon delivery of materials to customers or upon completion of production, as the case may be, in accordance with the term of the related agreements.

Advances received from customers are recorded as "Advance Receipts from Customers" in the consolidated statement of financial position.

Expenses are recognized when incurred (accrual basis).

q. Employee Benefits

The Group determines its employee benefits liabilities under Labor Law No. 13/2003 dated March 25, 2003 ("the Law"). PSAK No. 24 (Revised 2010), "Employee Benefits" requires cost of post employment benefits based on the Law is determined using the "Projected Unit Credit" actuarial valuation method.

2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

Keuntungan atau kerugian aktuarial diakui sebagai pendapatan atau beban apabila akumulasi keuntungan atau kerugian aktuarial neto yang belum diakui pada akhir tahun pelaporan sebelumnya melebihi jumlah yang lebih besar diantara 10% dari nilai kini imbalan pasti dan 10% dari nilai wajar aset program pada akhir periode pelaporan. Porsi keuntungan atau kerugian aktuarial yang diakui adalah kelebihan tersebut dibagi dengan rata-rata sisa masa kerja ekspektasian dari para pekerja terkait. Beban jasa lalu yang terjadi ketika memperkenalkan program imbalan pasti atau mengubah imbalan terutang pada program imbalan pasti yang ada, diamortisasi selama periode sampai imbalan tersebut menjadi hak.

Kelompok Usaha mengakui keuntungan atau kerugian atas kurtailmen atau penyelesaian pada saat terjadinya. Kurtailmen terjadi jika entitas menunjukkan komitmennya untuk mengurangi secara signifikan jumlah pekerja yang ditanggung oleh program, atau mengubah ketentuan dalam program yang menyebabkan bagian yang material dari jasa masa depan pekerja tidak lagi memberikan imbalan atau memberikan imbalan yang lebih rendah. Sebelum menentukan dampak kurtailmen atau penyelesaian, Kelompok Usaha mengukur kembali kewajiban dengan menggunakan asumsi aktuarial yang berlaku.

r. Pajak Penghasilan

Beban pajak kini ditetapkan berdasarkan taksiran laba kena pajak periode berjalan.

Aset pajak kini dan liabilitas pajak kini dilakukan saling hapus jika dan hanya jika entitas memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus jumlah yang diakui, dan bermaksud untuk menyelesaikan dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan.

Aset dan liabilitas pajak tangguhan diakui atas perbedaan temporer antara aset dan liabilitas untuk tujuan komersial dan untuk tujuan perpajakan setiap tanggal pelaporan. Manfaat pajak di masa mendatang, seperti saldo rugi fiskal yang belum digunakan, diakui sejauh besar kemungkinan realisasi atas manfaat pajak tersebut.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Actuarial gains or losses are recognized as income or expense when the net cumulative unrecognized actuarial gains and losses at the end of the previous reporting year exceeded the greater of 10% of the present value of defined benefit obligation and 10% of the fair value of plan assets at that date. The recognized portion of actuarial gains or losses is the excess divided by the expected average remaining working lives of the related employees. Past-service cost arising from the introduction of a defined benefit plan or changes in the benefits obligation of an existing plan are required to be amortized over the period until the benefits concerned become vested.

The Group recognizes gains or losses on curtailment or settlement when such occurs. A curtailment occurs when an entity is demonstrably committed to making a significant reduction in the number of employees covered by a plan, or amending the terms of a defined benefit plan so that a significant element of future service by current employees will no longer qualify for benefits, or will qualify only for reduced benefits. Before determining the effect of a curtailment or settlement, the Group remeasures the obligation using current actuarial assumptions.

r. Income Taxes

Current tax expense is provided based on the estimated taxable income for the period.

Current tax assets and current tax liabilities are offset if, and only if, the entity has a legally enforceable right to set off the recognized amounts, and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax assets and liabilities are recognized for temporary differences between the financial and the tax bases of assets and liabilities at each reporting date. Future tax benefits, such as the carry-forward of unused tax losses, are also recognized to the extent that realization of such benefits is probable.

Aset dan liabilitas pajak tangguhan diukur pada tarif pajak yang diharapkan akan digunakan pada periode ketika aset direalisasi atau ketika liabilitas dilunasi berdasarkan tarif pajak (dan peraturan perpajakan) yang berlaku atau secara substansial telah diberlakukan pada akhir periode pelaporan.

Aset pajak tangguhan dan liabilitas pajak tangguhan dilakukan saling hapus jika dan hanya jika entitas memiliki hak secara hukum untuk saling hapus aset pajak kini terhadap liabilitas pajak kini, dan aset pajak tangguhan dan liabilitas pajak tangguhan terkait dengan pajak penghasilan yang dikenakan oleh otoritas perpajakan atas entitas kena pajak, yang sama atau entitas kena pajak berbeda yang bermaksud untuk memulihkan aset dan liabilitas pajak kini dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan, pada setiap periode masa depan yang mana jumlah signifikan atas aset atau liabilitas pajak tangguhan diharapkan diselesaikan atau dipulihkan.

Jumlah tambahan pokok dan denda pajak berdasarkan Surat Ketetapan Pajak ("SKP") diakui sebagai pendapatan atau beban dalam laba rugi periode/tahun berjalan. Namun jika diajukan upaya penyelesaian selanjutnya, jumlah tersebut ditangguhkan pembebanannya sepanjang memenuhi kriteria pengakuan aset.

s. Laba per Saham

Laba per saham dasar dihitung dengan membagi laba atau rugi yang dapat diatribusikan kepada pemegang saham biasa entitas induk, dengan jumlah rata-rata tertimbang saham biasa yang beredar, dalam suatu periode.

t. Segmen Operasi

Entitas mengungkapkan informasi yang memungkinkan pengguna laporan keuangan untuk mengevaluasi sifat dan dampak keuangan dari aktivitas bisnis dan menggunakan "pendekatan manajemen" dalam menyajikan informasi segmen menggunakan dasar yang sama seperti halnya pelaporan internal. Segmen operasi dilaporkan dengan cara yang konsisten dengan pelaporan internal yang disampaikan kepada pengambil keputusan operasional. Dalam hal ini pengambil keputusan operasional yang mengambil keputusan strategis adalah Direksi.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the end of reporting period.

Deferred tax assets and deferred tax liabilities are offset if, and only if, the entity has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity, or different taxable entities that intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Additional tax principal and penalty amounts based on Tax Assessment Letters ("SKP") are recognized as income or expense in the current period/year profit or loss. However when further avenue is sought, such amounts are deferred if they meet the asset recognition criteria.

s. Earnings per Share

Basic earnings per share are computed by dividing net income attributable to ordinary equity holders of the parent entity, by the weighted average number of ordinary shares outstanding during the period.

t. Operating Segment

Entities disclose information that enable users of the financial statements to evaluate the nature and financial effects of the business activities and use a "management approach" under which segment information is presented on the same basis as that used for internal reporting purposes. Operating segment is reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker has been identified as the board of directors, which makes strategic decisions.

2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

u. Provisi dan Kontinjensi

Provisi diakui jika Kelompok Usaha memiliki kewajiban kini (baik bersifat hukum maupun bersifat konstruktif) yang akibat peristiwa masa lalu besar kemungkinannya penyelesaian kewajiban tersebut mengakibatkan arus keluar sumber daya yang mengandung manfaat ekonomi dan estimasi yang andal mengenai jumlah kewajiban tersebut dapat dibuat.

Provisi ditelaah pada setiap akhir periode pelaporan dan disesuaikan untuk mencerminkan estimasi terbaik yang paling kini. Jika arus keluar sumber daya untuk menyelesaikan kewajiban kemungkinan besar tidak terjadi, maka provisi dibatalkan.

Aset dan liabilitas kontinjensi tidak diakui dalam laporan keuangan konsolidasian. Liabilitas kontinjensi diungkapkan dalam laporan keuangan konsolidasian, kecuali arus keluar sumber daya yang mengandung manfaat ekonomi kemungkinannya kecil. Aset kontinjensi diungkapkan dalam laporan keuangan konsolidasian, jika terdapat kemungkinan besar arus masuk manfaat ekonomis akan diperoleh.

3. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING

Penyusunan laporan keuangan sesuai dengan Standar Akuntansi Keuangan di Indonesia mewajibkan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah-jumlah yang dilaporkan dalam laporan keuangan. Sehubungan dengan adanya ketidakpastian yang melekat dalam membuat estimasi, hasil sebenarnya yang dilaporkan di masa mendatang dapat berbeda dengan jumlah estimasi yang dibuat.

Kelompok Usaha mendasarkan asumsi dan estimasi pada parameter yang tersedia pada saat laporan keuangan konsolidasian disusun. Asumsi dan situasi mengenai perkembangan masa depan mungkin berubah akibat perubahan pasar atau situasi diluar kendali Kelompok Usaha. Perubahan tersebut dicerminkan dalam asumsi terkait pada saat terjadinya.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

u. Provisions and Contingencies

Provisions are recognized when the Group has a present obligation (legal or constructive) where, as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

Contingent assets and liabilities are not recognized in the consolidated financial statements. Contingent liabilities are disclosed in the consolidated financial statements, unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are disclosed in the consolidated financial statements where an inflow of economic benefits is probable.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of financial statements, in conformity with Indonesian Financial Accounting Standards, requires management to make judgments, estimations and assumptions that affect amounts reported therein. Due to the inherent uncertainty in making estimates, actual results reported in future periods may differ from those estimates.

The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions as they occur.

3. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Pertimbangan, estimasi dan asumsi berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Kelompok Usaha yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian:

Menentukan klasifikasi aset dan liabilitas keuangan

Kelompok Usaha menetapkan klasifikasi atas aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan mempertimbangkan apakah definisi yang ditetapkan PSAK No. 55 dipenuhi. Dengan demikian, aset keuangan dan liabilitas keuangan diakui sesuai dengan kebijakan akuntansi Kelompok Usaha. seperti diungkapkan pada Catatan 2f.

Menentukan nilai wajar dan perhitungan amortisasi biaya perolehan dari instrumen keuangan

Kelompok Usaha mencatat aset dan liabilitas keuangan tertentu pada nilai wajar dan pada biaya perolehan yang diamortisasi, yang mengharuskan penggunaan estimasi akuntansi. Sementara komponen signifikan atas pengukuran nilai wajar dan asumsi yang digunakan dalam perhitungan amortisasi biaya perolehan ditentukan menggunakan bukti obyektif yang dapat diverifikasi, jumlah nilai wajar atau amortisasi dapat berbeda bila Kelompok Usaha menggunakan metodologi penilaian atau asumsi yang berbeda. Perubahan tersebut dapat mempengaruhi secara langsung laba rugi Kelompok Usaha (Catatan 26).

Menilai jumlah terpulihkan dari aset keuangan

Kelompok Usaha mengevaluasi akun piutang tertentu yang diketahui bahwa pelanggan tertentu tidak dapat memenuhi kewajiban keuangannya. Dalam hal tersebut, menggunakan Kelompok Usaha pertimbangan, berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas pada, jangka waktu hubungan dengan pelanggan dan status kredit dari pelanggan berdasarkan catatan kredit dari pihak ketiga yang tersedia dan faktor pasar yang telah diketahui, untuk mencatat penyisihan spesifik atas pelanggan terhadap jumlah terutang guna mengurangi jumlah piutang yang diharapkan dapat diterima oleh Kelompok Usaha. spesifik ini dievaluasi kembali dan Penyisihan disesuaikan jika tambahan informasi yang diterima mempengaruhi jumlah penyisihan atas penurunan nilai piutang (Catatan 6 dan 7).

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

The following judgments, estimates and assumptions made by management in the process of applying the Group's accounting policies have the most significant effects on the amounts recognized in the consolidated financial statements:

<u>Determining classification of financial assets and financial liabilities</u>

The Group determines the classifications of certain assets and liabilities as financial assets and financial liabilities by judging if they meet the definition set forth in PSAK No. 55. Accordingly, the financial assets and financial liabilities are accounted for in accordance with the Group's accounting policies disclosed in Note 2f.

<u>Determining fair value and calculation of cost</u> <u>amortization of financial instruments</u>

The Group records certain financial assets and liabilities at fair values and at amortized costs, which requires the use of accounting estimates. While significant components of fair value measurement and assumptions used in the calculation of cost amortization were determined using verifiable objective evidence, the fair value or amortization amount would differ if the Group utilized different valuation methodology or assumptions. Such changes would directly affect the Group's profit or loss (Note 26).

Assessing recoverable amount of financial assets

The Group evaluates specific accounts receivable where it has information that certain customers are unable to meet their financial obligations. In these cases, the Group uses judgment, based on available facts and circumstances, including but not limited to, the length of its relationship with the customer and the customer's current credit status based on any available third party credit reports and known market factors, to record specific provisions for customers against amounts due to reduce its receivable amounts that the Group expects to collect. These specific provisions are re-evaluated and adjusted as additional information received affects the provision for impairment (Notes 6 and 7).

3. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Menentukan amortisasi persediaan materi program

Persediaan materi program dengan pembelian secara putus untuk program film, sinetron dan program serial, diamortisasi berdasarkan basis akselerasi selama jumlah penayangan yang diharapkan, sedangkan program dibawah perjanjian lisensi diamortisasi berdasarkan metode garis lurus selama periode lisensi atau berdasarkan jumlah penayangan, mana yang lebih dahulu. Amortisasi tersebut adalah secara umum diharapkan dalam industri dimana Kelompok Usaha menjalankan bisnisnya. Perubahan dalam belanja iklan, penjualan waktu tayang, peringkat, pangsa pemirsa dan perkembangan teknologi dapat mempengaruhi amortisasi persediaan materi program dan karenanya metode amortisasi tersebut di masa depan mungkin direvisi (Catatan 8).

Menentukan metode penyusutan dan estimasi umur manfaat aset tetap

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen mengestimasi masa manfaat ekonomis aset tetap antara tiga (3) sampai dengan dua puluh (20) tahun. Ini adalah umur yang secara umum diharapkan dalam industri dimana Kelompok Usaha menjalankan bisnisnya. Perubahan tingkat pemakaian dan perkembangan teknologi dapat mempengaruhi masa manfaat ekonomis dan nilai sisa aset, dan karenanya biaya penyusutan masa depan mungkin direvisi (Catatan 2l dan 10).

Alokasi harga beli dalam suatu kombinasi bisnis

Akuntansi akuisisi mensyaratkan penggunaan estimasi dan pertimbangan akuntansi untuk mengalokasikan harga perolehan terhadap nilai pasar wajar dari aset dan liabilitas yang teridentifikasi dari entitas yang diakuisisi. Setiap kelebihan dari harga perolehan atas nilai pasar wajar yang diestimasikan dari aset neto yang diakuisisi diakui sebagai *goodwill* dalam laporan posisi keuangan konsolidasian. Dengan demikian, pertimbangan yang dibuat dalam mengestimasi nilai pasar wajar yang diatribusikan ke aset dan liabilitas entitas yang diakuisisi dapat mempengaruhi kinerja keuangan Kelompok Usaha secara material.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

<u>Determining amortization method of program material inventories</u>

Program material inventories for outright purchased programs such as film programs, sinetrons and series programs are amortized based on an accelerated basis over the number of expected telecasts, while programs under license arrangements are amortized based on the straight-line method over the periods of the related license or number of telecasts, whichever is earlier. The amortization practices are commonly applied in the industry in which the Group conducts its business. Changes in advertising expenditure, sale of airtime, rating, audience share and technological development could impact on the amortization method of program material inventories and therefore, the amortization method could be revised in the future (Note 8).

<u>Determining depreciation method and estimated useful</u> lives of fixed assets

The costs of fixed assets are depreciated on a straightline basis over their estimated useful lives. Management properly estimates the useful lives of these fixed assets to be within three (3) to twenty (20) years. These are common life expectancies applied in the industry in which the Group conducts its business. Changes in the expected level of usage and technological development could impact on the useful economic lives and residual values of these assets, and therefore future depreciation charges could be revised (Notes 2I and 10).

Purchase price allocation in a business combination

Accounting for acquisitions requires extensive use of accounting estimates and judgments to allocate the purchase price to the fair market values of the acquiree's identifiable assets and liabilities at the acquisition date. Any excess in the purchase price over the estimated fair market values of the net assets acquired is recorded as goodwill in the consolidated financial statements. Thus, the numerous judgments made in estimating the fair market value to be assigned to the acquiree's assets and liabilities can materially affect the Group's financial performance.

3. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Menilai penurunan nilai aset non-keuangan tertentu

Penyisihan keusangan materi program persediaan diestimasi berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas kepada, kondisi fisik persediaan yang dimiliki, harga jual pasar, dan estimasi biaya penyelesaian. Provisi dievaluasi kembali dan disesuaikan jika terdapat tambahan informasi yang mempengaruhi jumlah yang diestimasi (Catatan 8).

Jumlah terpulihkan aset tetap dan goodwill didasarkan pada estimasi dan asumsi khususnya mengenai prospek pasar dan arus kas terkait dengan aset. Estimasi arus kas masa depan mencakup perkiraan mengenai pendapatan masa depan. Setiap perubahan dalam asumsi-asumsi ini mungkin memiliki dampak material terhadap pengukuran jumlah terpulihkan dan bisa mengakibatkan penyesuaian penyisihan penurunan nilai yang sudah dibukukan.

Pada tanggal 30 Juni 2014 dan 31 Desember 2013, Kelompok Usaha menilai bahwa tidak ada indikasi penurunan nilai persediaan materi program, uang muka pembelian peralatan, aset tetap, *goodwill* dan aset tidak lancar lainnya.

Estimasi beban pensiun dan imbalan kerja

Penentuan liabilitas dan biaya pensiun dan liabilitas imbalan kerja Kelompok Usaha bergantung pada pemilihan asumsi yang digunakan dalam menghitung jumlah-jumlah tersebut. Asumsi tersebut termasuk antara lain, tingkat diskonto, tingkat kenaikan gaji tahunan, tingkat pengunduran diri karyawan tahunan, tingkat kecacatan, umur pensiun dan tingkat kematian. Sementara Kelompok Usaha berkeyakinan bahwa asumsi tersebut adalah wajar dan sesuai, perbedaan signifikan pada hasil aktual atau perubahan signifikan dalam asumsi yang ditetapkan Kelompok Usaha dapat mempengaruhi secara material liabilitas dan beban imbalan kerja (Catatan 19).

Menentukan pajak penghasilan

Pertimbangan signifikan dilakukan dalam menentukan provisi atas pajak penghasilan badan. Terdapat transaksi dan perhitungan tertentu yang penentuan pajak akhirnya adalah tidak pasti sepanjang kegiatan usaha normal. Kelompok Usaha mengakui liabilitas atas pajak penghasilan badan berdasarkan estimasi apakah akan terdapat tambahan pajak penghasilan badan (Catatan 18).

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

Assessing impairment of certain non-financial assets

Allowance for obsolescence of program material inventories is estimated based on available facts and circumstances, including but not limited to, the inventories own physical condition, their market selling prices, and estimated costs of completion. The provisions are re-evaluated and adjusted as additional information received affects the amount estimated (Note 8).

The recoverable amounts of fixed assets and goodwill are based on estimates and assumptions regarding in particular the expected market outlook and future cash flows associated with the assets. Estimated future cash flows include estimates of future revenues. Any changes in these assumptions may have a material impact on the measurement of the recoverable amount and could result in adjustments to the provision of impairment already booked

As of June 30, 2014 and December 31, 2013, The Group assessed that there was no indication of impairment of its program material inventories, advances for purchase of equipment, fixed assets, goodwill or other non-current assets.

Estimation of pension cost and employee benefits

The determination of the Group's liabilities and cost for pension and employee benefits is dependent on its selection of certain assumptions used in calculating such amounts. These assumptions include among others, discount rates, annual salary increase rate, annual employee turn-over rate, disability rate, retirement age and mortality rate. While the Group believes that its assumptions are reasonable and appropriate, significant differences in the Group's actual results or significant changes in the Group's assumptions may materially affect its employee benefits liabilities and expenses (Note 19).

Determining income taxes

Significant judgment is involved in determining provision for corporate income tax. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognizes liabilities for expected corporate income tax issues based on estimates of whether additional corporate income tax will be due (Note 18).

Kelompok Usaha menelaah aset pajak tangguhan pada setiap tanggal pelaporan dan mengurangi nilai tercatat sepanjang tidak ada kemungkinan bahwa laba kena pajak memadai untuk mengkompensasi sebagian atau seluruh aset pajak tangguhan. Kelompok Usaha juga menelaah waktu yang diharapkan dan tarif pajak atas pemulihan perbedaan temporer dan menyesuaikan pengaruh atas pajak tangguhan yang sesuai (Catatan 18).

Mengevaluasi provisi dan kontinjensi

Kelompok Usaha melakukan pertimbangan untuk membedakan antara provisi dan kontinjensi serta mempersiapkan provisi yang sesuai untuk proses hukum atau kewajiban konstruktif, jika ada, sesuai dengan kebijakan provisinya dan mempertimbangkan risiko dan ketidakpastian yang relevan.

4. AKUISISI ENTITAS ANAK

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

The Group reviews its deferred tax assets at each reporting date and reduces the carrying amount to the extent it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be utilized. The Group also reviews the expected timing and tax rates upon reversal of temporary differences and adjusts the impact of deferred tax accordingly (Note 18).

Evaluating provisions and contingencies

The Group exercises its judgment to distinguish between provisions and contingencies and sets up appropriate provisions for its legal and constructive obligations, if any, in accordance with its policies on provisions and takes relevant risks and uncertainty into account.

4. ACQUISITION OF SUBSIDIARIES

On June 23, 2009, as further amended on August 18, 2009 and September 28, 2009, PT Cakrawala Andalas Televisi ("CAT") and PT Asia Global Media ("AGM") entered into a Restructuring Agreement with PT Bakrie Global Ventura (formerly PT CMA Indonesia) ("BGV") and PT Bakrie Capital Indonesia ("BCI"), together referred to as "BGV Parties"; Promised Result Limited ("PR"), Good Respond Limited ("GR"), and Fast Plus Limited ("FP"), together referred to as "Star TV Parties"; Asian Broadcasting FZ LLC ("Star HK"); and the Company to restructure, among others, the business interests of BGV Parties and Star Parties in CAT and AGM. Manajemen berpendapat bahwa persediaan materi program tidak perlu diasuransikan terhadap risiko kerugian atas kebakaran atau pencurian karena nilai wajar persediaan materi program tidak dapat diterapkan sebagai dasar untuk menentukan nilai pertanggungan asuransi dan bila terjadi kebakaran atau pencurian atas persediaan materi program yang dibeli, CAT dapat meminta penggantian dari distributor bersangkutan selama persediaan materi program tersebut belum ditayangkan dan belum habis masa berlakunya.

Management believes that the program material inventories do not need to be insured against risk of loss from fire or theft because the fair value of the program material inventories could not be established for the purpose of insurance. If such loss should occur, CAT can request a replacement from the relevant distributor for as long as the program material inventories have not yet been aired or expired.

28. INSTRUMEN KEUANGAN (Lanjutan)

Berdasarkan PSAK 60, "Instrumen Keuangan: Pengungkapan", terdapat tingkatan hirarki nilai wajar sebagai berikut:

- harga kuotasian (tidak disesuaikan) dalam pasar aktif untuk aset atau liabilitas yang identik (tingkat 1),
- input selain harga kuotasian yang termasuk dalam tingkat 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung (misalnya harga) atau secara tidak langsung (misalnya derivasi dari harga pasar) (tingkat 2), dan
- c) input untuk aset atau liabilitas yang bukan berdasarkan data pasar yang dapat diobservasi (input yang tidak dapat diobservasi) (tingkat 3).

Metode dan asumsi berikut ini digunakan untuk mengestimasi nilai wajar untuk setiap kelompok instrumen keuangan sepanjang nilai tersebut dapat diestimasi:

Aset dan liabilitas keuangan jangka pendek:

 Instrumen keuangan jangka pendek dengan jatuh tempo satu tahun atau kurang (kas dan setara kas, piutang usaha dan piutang lain-lain).

Instrumen keuangan ini diperkirakan sebesar nilai tercatat mereka karena sebagian besar merupakan jangka pendek.

Aset dan liabilitas keuangan jangka panjang:

 Liabilitas keuangan jangka panjang dengan suku bunga tetap.

Nilai wajar dari liabilitas keuangan ini ditentukan dengan mendiskontokan arus kas masa datang menggunakan suku bunga yang berlaku dari transaksi pasar yang dapat diamati untuk instrumen dengan persyaratan, risiko kredit dan jatuh tempo yang sama.

Aset dan liabilitas keuangan jangka panjang lainnya

Estimasi nilai wajar didasarkan pada nilai diskonto dari arus kas masa datang yang disesuaikan untuk mencerminkan risiko pihak lawan (untuk aset keuangan) dan risiko kredit Kelompok Usaha (untuk liabilitas keuangan) dan menggunakan suku bunga bebas risiko (*risk-free rates*) dari instrumen yang serupa.

28. FINANCIAL INSTRUMENTS (Continued)

Based on PSAK 60, "Financial Instruments: Disclosures", there are levels of fair value hierarchy as follows:

- a) quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1),
- b) inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from market prices) (level 2), and
- inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to do so:

Short-term financial assets and liabilities:

 Short-term financial instruments with remaining maturities of one year or less (cash and cash equivalents, trade receivables and other receivables).

These financial instruments approximate to their carrying amounts largely due to their short-term maturities.

Long-term financial assets and liabilities:

• Long-term fixed-rate financial liabilities.

The fair value of these financial liabilities is determined by discounting future cash flows using applicable rates from observable current market transactions for instruments with similar terms, credit risk and remaining maturities.

• Other long-term financial assets and liabilities

Estimated fair value is based on the discounted value of future cash flows adjusted to reflect counterparty risk (for financial assets) and the Group's own credit risk (for financial liabilities) and using risk-free rates for similar instruments.

28. INSTRUMEN KEUANGAN (Lanjutan)
