# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Non-controlling interest represents a portion of the profit or loss and net assets not attributable to the parent and is presented separately in the consolidated statement of comprehensive income, and within equity in the consolidated statement of financial position, separate from equity attributable to the parent.

Total comprehensive income is attributed to the owners of the parent company and the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

All significant intercompany transactions and balances have been eliminated.

<u>Changes in the ownership interests without change of control</u>

Changes in a parent's ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions, in which the carrying amounts of the controlling and noncontrolling interests are adjusted to reflect the changes in their relative interests in the subsidiary. The difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the parent.

# Disposal of subsidiaries

When a parent loses control of a subsidiary, it derecognises the assets (including goodwill), liabilities and related equity components of the former subsidiary, and measures any investment retained in the former subsidiary at its fair value at the date when control is lost. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the parent had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized other comprehensive income are reclassified to profit or loss. The resulted gain or loss is recognized in profit or loss attributed to the owners of the parent.

#### c. Business Combination

Any excess of the aggregate of the fair value of the consideration transferred, the non-controlling interest's proportionate share of the acquiree's net identifiable assets, and the fair value of the acquirer's previously held equity interest in the acquiree, over the fair values of the identifiable net assets acquired is recognized as goodwill. #### d. Transactions with Related Parties

The Group discloses transactions with related parties as defined in PSAK No. 7 (Revised 2010), "Related Party Disclosure".

The transactions are made based on terms agreed by the parties, whereas such terms may not be the same as those for transactions with unrelated parties.

All significant transactions with related parties, whether or not conducted under the same terms and conditions as those with third parties, are disclosed in the notes to the consolidated financial statements.

### e. Foreign Currency Transactions and Balances

Transactions in foreign currencies are translated into the functional currency at the rates of exchange prevailing at the time the transactions are made. At the end of the reporting period, monetary assets and liabilities denominated in foreign currencies are adjusted to the functional currency to reflect the middle exchange rate published by Bank Indonesia at the last banking transaction date of the period. The gains or losses resulting from such adjustment or settlement of each monetary asset and liability denominated in foreign currencies are credited or charged to the current year's profit or loss.

Pinjaman yang diberikan dan piutang

Pinjaman yang diberikan dan piutang adalah aset keuangan non derivatif dengan pembayaran tetap atau telah ditentukan, yang tidak mempunyai kuotasi di pasar aktif. Aset keuangan tersebut diukur sebesar biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif, dikurangi dengan penurunan nilai. Aset keuangan tersedia untuk dijual (AFS)

Aset keuangan AFS adalah aset keuangan non derivatif vang ditetapkan sebagai tersedia untuk dijual atau yang tidak diklasifikasikan dalam tiga kategori sebelumnya. Setelah pengakuan awal, aset keuangan AFS diukur dengan nilai wajar dengan keuntungan atau kerugian yang belum terealisasi diakui dalam komponen ekuitas sampai aset keuangan tersebut dihentikan pengakuannya atau sampai diturunkan nilainya dan pada saat yang sama keuntungan atau kerugian kumulatif yang sebelumnya diakui dalam ekuitas harus diakui laba rugi. # 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Loans and receivables

Financial assets are classified as at FVTPL where the financial assets are either held for trading or designated as FVTPL at initial recognition. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivative assets are also classified as held for trading unless they are designated as effective hedging instruments.

### Available-for-sale (AFS) financial assets

AFS financial assets are non-derivative financial assets that are designated as available-for-sale or not classified in any of the three preceding categories. After initial recognition, AFS financial assets are measured at fair value with unrealized gains and losses being recognized as a component of equity until the financial assets are derecognized or until the financial assets are determined to be impaired, at which time the cumulative gains or losses previously reported in equity are included in profit or loss. These financial assets are classified as non-current assets unless the intention is to dispose of them within twelve months from the statement of financial position date.

### Impairment of financial assets

The Group evaluates at each reporting date whether any of its financial assets are impaired.

Financial assets measured at amortized cost

2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

Jika terdapat bukti obyektif penurunan nilai, maka jumlah kerugian tersebut, yang diukur sebagai selisih antara nilai tercatat aset dengan nilai kini estimasi arus kas masa datang (tidak termasuk kerugian kredit di masa datang yang belum terjadi) yang didiskonto menggunakan suku bunga efektif yang dihitung saat pengakuan awal aset tersebut, diakui pada laba rugi.

• Aset keuangan tersedia untuk dijual (AFS)

Jika terdapat bukti obyektif bahwa aset AFS mengalami penurunan nilai, maka kerugian kumulatif yang sebelumnya diakui secara langsung dalam ekuitas harus dikeluarkan dari ekuitas dan diakui pada laba rugi.

### Penghentian pengakuan aset keuangan

Kelompok Usaha menghentikan pengakuan aset keuangan, jika dan hanya jika: hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir; atau Kelompok Usaha mentransfer hak kontraktual untuk menerima arus kas yang berasal dari aset keuangan; atau tetap memiliki hak kontraktual untuk menerima arus kas yang berasal dari aset keuangan namun juga menanggung kewajiban kontraktual untuk membayar arus kas yang diterima tersebut kepada satu atau lebih pihak penerima melalui suatu kesepakatan yang memenuhi persyaratan tertentu. Ketika Kelompok Usaha mentransfer aset keuangan, maka Kelompok Usaha mengevaluasi sejauh mana kelompok Usaha tetap memiliki risiko dan manfaat atas kepemilikan aset keuangan tersebut.

# (2) Liabilitas keuangan

### Pengakuan awal

Kelompok Usaha menetapkan klasifikasi liabilitas keuangannya pada saat pengakuan awal. Instrumen utang dan ekuitas dikelompokkan sebagai liabilitas keuangan atau sebagai ekuitas sesuai dengan substansi pengaturan kontraktual.

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

If there is objective evidence of impairment, the amount of loss, which is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not been incurred) discounted at the effective interest rate computed at initial recognition of the asset, is recognized in profit or loss.

• Available-for-sale (AFS) financial assets

If there is objective evidence that an AFS asset is impaired, the cumulative loss previously recognized directly in equity is transferred from equity to profit or loss.

### Derecognition of financial assets

The Group shall derecognize financial assets when, and only when: the contractual rights to the cash flows from the financial asset expire; the contractual rights to receive the cash flows of the financial asset are transferred to another entity; or the contractual rights to receive the cash flows of the financial asset are retained but they assume a contractual obligation to pay the cash flows to one or more recipients in an arrangement that meets certain conditions. When the Group transfers a financial asset, it shall evaluate the extent to which it retains the risks and rewards of ownership of the financial asset.

Liabilitas keuangan diakui pada awalnya sebesar nilai wajar dan, dalam hal pinjaman dan utang, termasuk biaya transaksi yang dapat diatribusikan secara langsung.

Instrumen ekuitas adalah setiap kontrak yang memberikan hak residual atas aset suatu entitas setelah dikurangi seluruh liabilitasnya. Instrumen ekuitas yang diterbitkan oleh Kelompok Usaha dicatat sebesar hasil yang diperoleh, dikurangi biaya penerbitan instrumen ekuitas.

Instrumen keuangan majemuk, seperti obligasi atau instrumen sejenis yang dapat dikonversi oleh pemegangnya menjadi saham biasa dengan jumlah yang telah ditetapkan, dipisahkan antara liabilitas keuangan dan ekuitas sesuai dengan substansi pengaturan kontraktual. Pada tanggal penerbitan instrumen keuangan majemuk, nilai wajar dari komponen liabilitas diestimasi dengan menggunakan suku bunga yang berlaku di pasar untuk instrumen non-convertible vang serupa. Jumlah ini dicatat sebagai liabilitas dengan dasar biaya perolehan diamortisasi menggunakan metode suku bunga efektif sampai dengan liabilitas tersebut berakhir melalui konversi atau pada tanggal instrumen jatuh tempo. Komponen ekuitas ditentukan dengan cara mengurangkan jumlah komponen liabilitas dari keseluruhan nilai wajar instrumen keuangan majemuk. Jumlah tersebut diakui dan dicatat dalam ekuitas, dikurangi dengan pajak penghasilan, dan tidak ada pengukuran setelah pengakuan awal.

Kelompok Usaha mengklasifikasikan liabilitas keuangannya ke dalam kategori: pinjaman dan utang.

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Financial liabilities are classified as financial liabilities at fair value through profit or loss, financial liabilities measured at amortized cost, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. Financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, inclusive of directly attributable transaction costs.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recorded at the proceeds received, net of direct issuance costs.

Compound financial instruments, a bond or similar instrument convertible by the holder into a fixed number of ordinary shares, are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangement. At the date of issuance of compound financial instruments, the fair value of the liability component is estimated using the prevailing market interest rate for a similar nonconvertible instrument. This amount is recorded as a liability on an amortized cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date. The equity component is determined by deducting the amount of the liability component from the fair value of the compound financial instruments as a whole. This amount is recognized and included in equity, net of income tax effects, and is not subsequently remeasured.

The Group classifies its financial liabilities into this category: loans and borrowings.

### Penghentian pengakuan liabilitas keuangan

Kelompok Usaha menghentikan pengakuan liabilitas keuangan jika, dan hanya jika, liabilitas Kelompok Usaha dihentikan, dibatalkan atau kadaluwarsa.

### (3) Instrumen derivatif

Instrumen derivatif dicatat pada pengakuan awal sebesar nilai wajar pada tanggal perjanjian derivatif ditandatangani dan diukur kembali setiap akhir periode laporan. Derivatif dicatat sebagai aset keuangan saat nilai wajar positif dan liabilitas keuangan saat nilai wajar negatif.

Derivatif melekat disajikan dengan kontrak utamanya pada laporan posisi keuangan yang mencerminkan penyajian yang memadai atas seluruh arus kas pada masa datang dari instrumen tersebut secara keseluruhan. Derivatif yang melekat pada instrumen keuangan atau kontrak awal diperlakukan sebagai derivatif yang berbeda saat risiko dan karakteristiknya tidak saling berhubungan dengan kontrak utamanya dan kontrak utama tersebut tidak diukur dengan nilai wajar serta perubahan pada nilai wajar diakui dalam laba rugi.

Derivatif disajikan sebagai aset tidak lancar atau liabilitas jangka panjang jika sisa periode jatuh tempo dari instrumen tersebut lebih dari dua belas (12) bulan dan tidak diharapkan untuk direalisasi atau diselesaikan dalam jangka waktu dua belas (12) bulan.

### Derecognition of financial liabilities

The Group derecognizes financial liabilities when, and only when, the Group's obligations are discharged, cancelled or expire.

# (3) Derivative financial instruments

Derivative instruments are initially recognized at fair value as at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each end of reporting period. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Embedded derivatives are presented with the host contract on statement of financial position, which represents an appropriate presentation of overall future cash flows for the instrument taken as a whole. Derivatives embedded in other financial instruments or other host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at fair value, with changes in fair value recognized in profit or loss.

A derivative is presented as a non-current asset or a long-term liability if the remaining maturity of the instrument is more than twelve (12) months and it is not expected to be realized or settled within twelve (12) months.

2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

# (5) Instrumen keuangan yang diukur pada biaya perolehan diamortisasi

Biaya perolehan diamortisasi dihitung menggunakan metode suku bunga efektif dikurangi dengan penyisihan atas penurunan nilai. # 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Gains or losses arising from changes in the fair value of the derivative instrument are recognized currently in earnings, unless meeting all the specific requirements (i.e. formal documentation, designation and assessment of the effectiveness of the transaction) to allow deferral as "Other Comprehensive Income" under certain types of hedge accounting.

None of the derivative instruments of the Group qualifies the specific criteria for hedge accounting, and therefore, are not designated as hedges for accounting purposes.

# (4) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

# (5) Financial instruments measured at amortized

Amortized cost is computed using the effective interest method less any allowance for impairment. The calculation takes into account any premium or discount on acquisition and includes transaction costs and fees that are integral part of the effective interest rate.

2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

# (6) Instrumen keuangan yang diukur pada biaya perolehan diamortisasi

instrumen Nilai waiar keuangan diperdagangkan secara aktif di pasar keuangan yang terorganisasi, jika ada, ditentukan dengan mengacu pada kuotasi harga di pasar aktif pada penutupan bisnis pada akhir periode pelaporan. Untuk instrumen keuangan yang tidak memiliki pasar aktif, nilai wajar ditentukan dengan menggunakan teknik penilaian. Teknik penilaian tersebut mencakun penggunaan transaksitransaksi pasar yang wajar antara pihak-pihak yang mengerti dan berkeinginan (arm's length market transactions); referensi atas nilai wajar terkini dari instrumen lain yang secara substansial sama; analisa arus kas yang didiskonto; atau model penilaian lain.

### g. Kas dan Setara Kas

Kas dan setara kas terdiri dari saldo kas dan bank, serta deposito berjangka yang jatuh tempo dalam waktu tiga (3) bulan atau kurang yang tidak dibatasi penggunaannya.

### h. Piutang Usaha dan Piutang Lain-lain

Piutang pada awalnya diakui sebesar nilai wajar dan selanjutnya diukur pada biaya perolehan diamortisasi dengan menggunakan metode bunga efektif, dikurangi penyisihan atas penurunan nilai. Penyisihan atas penurunan nilai piutang dibentuk pada saat terdapat bukti obyektif bahwa saldo piutang Kelompok Usaha tidak dapat ditagih.

Besarnya penyisihan merupakan selisih antara nilai aset tercatat dan nilai sekarang dari estimasi arus kas masa depan, didiskontokan dengan tingkat suku bunga efektif. Penurunan nilai aset tercatat dicatat di dalam akun penyisihan dan nilai kerugian diakui di dalam laba atau rugi. Ketika tidak dapat ditagih, piutang dihapuskan bersama dengan penyisihan piutang. Pemulihan nilai setelah penghapusan piutang diakui sebagai penghasilan dalam laba rugi.

# (6) Financial instruments measured at amortized cost

The fair value of financial instruments that are actively traded in organized financial markets if any, is determined by reference to quoted market bid prices at the close of business at the end of the reporting period. For financial instruments where there is no active market, fair value is determined using valuation techniques. Such techniques may include using arm's length market transaction, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis, or other valuation models.

# g. Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand and in banks, and time deposits with original maturities within three (3) months or less that are not restricted in use.

#### h. Trade and Other Receivables

Receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less any allowance for impairment. An allowance for impairment of receivables is established when there is objective evidence that the outstanding amount of the Group's receivables will not be collected.

The amount of the allowance is the difference between the assets carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The carrying amount of the receivables is reduced through the use of an allowance account, and the amount of the loss is recognized in profit or loss. When a receivable is uncollectible, it is written off against the allowance for impairment of receivables. Subsequent recoveries of amounts previously written off are credited against profit or loss.

Program produksi sendiri, infotainment, berita, olahraga dan program talk show, diamortisasi sepenuhnya pada saat ditayangkan. Biaya perolehan dari persediaan materi program ditentukan dengan menggunakan metode identifikasi khusus.

Persediaan materi program yang telah habis masa berlakunya tetapi belum ditayangkan serta persediaan materi program yang tidak layak tayang dihapuskan dan dibebankan dalam laba rugi tahun berjalan.

Investasi pada entitas asosiasi dicatat dengan menggunakan metode ekuitas, dimana pada awalnya diakui sebesar biaya perolehan. Selanjutnya bagian Kelompok Usaha atas laba rugi entitas asosiasi, setelah penyesuaian yang diperlukan terhadap dampak penyeragaman kebijakan akuntansi dan eliminasi laba atau rugi yang dihasilkan dari transaksi antara Kelompok Usaha dan entitas asosiasi, akan menambah atau mengurangi jumlah tercatat investasi tersebut dan diakui sebagai laba rugi Kelompok Usaha. Penerimaan distribusi dari entitas asosiasi mengurangi nilai tercatat investasi. Penyesuaian terhadap jumlah tercatat tersebut juga diperlukan jika terdapat perubahan dalam proporsi bagian Kelompok Usaha atas entitas asosiasi yang timbul dari pendapatan komprehensif lain dari entitas asosiasi. Bagian Kelompok Usaha atas perubahan tersebut diakui dalam pendapatan komprehensif lain dari Kelompok Usaha.

Bila terdapat perubahan yang diakui langsung pada ekuitas dari entitas asosiasi, Kelompok Usaha mengakui bagiannya atas perubahan tersebut dan mengungkapkan hal ini, jika relevan dalam laporan perubahan ekuitas konsolidasian interim.

Goodwill yang terkait dengan akuisisi entitas asosiasi termasuk dalam jumlah tercatat investasi. Jika terdapat goodwill negatif, maka jumlah tersebut diakui di dalam laba rugi. Goodwill tidak diamortisasi tetapi dilakukan uji penurunan nilai setiap tahun.

Apabila nilai tercatat investasi telah mencapai nilai nol, kerugian selanjutnya akan diakui bila Kelompok Usaha mempunyai komitmen untuk menyediakan bantuan pendanaan atau menjamin kewajiban entitas asosiasi yang bersangkutan.

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Investment in an associate is accounted for using the equity method, under which it is initially recognized at cost. Subsequently, the Group's share of the profit or loss of the associate, after any adjustments necessary to give effect to uniform accounting policies and elimination of profits and losses resulting from transactions between the Group and the associate, increases or decreases its carrying amount and is recognized to the Group's profit or loss. Distributions received from the associate reduce the carrying amount of the investment. Adjustments to the carrying amount may also be necessary for changes in the Group's proportionate interest in the associate arising from changes in the associate's other comprehensive income. The Group's share of those changes is recognized in other comprehensive income of the Group.

When there has been a change recognized directly in other comprehensive income of the associate, the Group recognizes its share of any such change and discloses this, when applicable, in the interim consolidated statement of changes in equity.

Goodwill on acquisition of an associate is included in the carrying amount of the investment. In the case of negative goodwill, such amount is recognized to profit or loss. Goodwill is no longer amortized but annually assessed for impairment.

Once an investment's carrying value has been reduced to zero, further losses are taken up only if the Group has committed to provide financial support to, or has guaranteed the obligations of the associate.

#### Perubahan bagian kepemilikan

Kelompok Usaha menghentikan penggunaan metode ekuitas sejak tanggal Kelompok Usaha tidak lagi memiliki pengaruh signifikan atas entitas asosiasi dan mengukur setiap investasi yang tersisa pada entitas asosiasi pada nilai wajar. Kelompok Usaha mereklasifikasi keuntungan atau kerugian yang sebelumnya diakui dalam pendapatan komprehensif lain dari ekuitas ke laporan laba rugi (sebagai penyesuaian reklasifikasi) dan mengakui dalam laporan laba rugi setiap selisih antara nilai wajar investasi yang tersisa dan hasil pelepasan sebagian kepemilikan pada entitas asosiasi dengan jumlah tercatat investasi pada tanggal ketika Kelompok Usaha kehilangan pengaruh signifikan atas entitas asosiasi tersebut.

Jika bagian kepemilikan Kelompok Usaha pada entitas asosiasi berkurang, namun investasi tersebut tetap sebagai investasi pada entitas asosiasi, maka Kelompok Usaha mereklasifikasi ke dalam laporan laba rugi hanya suatu jumlah proporsional dari keuntungan atau kerugian yang sebelumnya diakui dalam pendapatan komprehensif lain.

# <u>Penurunan nilai investasi pada entitas asosiasi dan</u> enttias pengendalian bersama

Kelompok Usaha menentukan apakah diperlukan untuk mengakui tambahan rugi penurunan nilai atas investasi pada entitas asosiasi dan entitas pengendalian bersama. Kelompok Usaha menentukan pada setiap tanggal pelaporan apakah terdapat bukti yang obyektif yang mengindikasikan bahwa investasi pada entitas asosiasi dan entitas pengendalian bersama mengalami penurunan nilai. Dalam hal ini, Kelompok Usaha menghitung jumlah penurunan nilai berdasarkan selisih antara iumlah terpulihkan atas investasi pada entitas asosiasi dan entitas pengendalian bersama dan nilai tercatatnya dan mengakuinya dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### Changes in the ownership interests

The Group discontinues the use of the equity method from the date when it ceases to have significant influence over an associate and measures at fair value any investment the Group retains in the former associate. The Group reclassifies the gain or loss previously recognized in other comprehensive income from equity to profit or loss (as a reclassification adjustment), and recognize in profit or loss any difference between the fair value of any retained investment and any proceeds from disposing of the partial interest in the associate and the carrying amount of the investment at the date it loses significant influence over the associate.

If the Group's ownership interest in an associate is reduced, but the investment continues to be an associate, the Group reclassifies to profit or loss only a proportionate amount of the gain or loss previously recognized in other comprehensive income.

# <u>Impairment of investments in associated and jointly</u> controlled entities

The Group determines whether it is necessary to recognize an additional impairment loss on the Group's investments in associated and jointly-controlled entities. The Group determines at each reporting date whether there is any objective evidence that the investments in associated and jointly-controlled entities is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the investment in associated and jointly-controlled entities and the carrying value, and recognizes the amount in the consolidated statement of profit or loss and other comprehensive income.

#### m. Aset Tetap

Kelompok Usaha telah memilih untuk menggunakan model biaya sebagai kebijakan akuntansi pengukuran aset tetapnya.

Seluruh aset tetap awalnya diakui sebesar biaya perolehan, yang terdiri atas harga perolehan dan biaya-biaya tambahan yang dapat diatribusikan langsung untuk membawa aset ke lokasi dan kondisi yang diinginkan supaya aset tersebut siap digunakan sesuai dengan maksud manajemen.

Setelah pengakuan awal, aset tetap, kecuali tanah, dinyatakan pada biaya perolehan dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai.

Penyusutan dihitung dengan metode garis lurus selama umur manfaat aset. Taksiran masa manfaat ekonomis aset tetap, sebagai berikut:

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### m. Fixed Assets

The Group has chosen the cost model as its accounting policy for fixed assets measurement.

All fixed assets are initially recognized at cost, which comprises their purchase price and any costs directly attributable in bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Subsequent to initial recognition, fixed assets, except land, are carried at cost less any subsequent accumulated depreciation and impairment losses.

Depreciation is calculated on a straight-line basis over the useful lives of the assets. The estimated useful lives of the assets are as follows:

	Tahun / Year	
Bangunan dan instalasi	3 - 20	Buildings and installation
Menara, transmiter dan antena	10	Tower, transmitter and antenna
Peralatan studio dan penyiaran	5 - 15	Studio and broadcasting equipment
Perabotan dan peralatan kantor,	4 - 5	Furniture and office equipment,
Peralatan computer dan kendaraan	4 - 5	Computer equipment and vehicles

Pada setiap akhir periode pelaporan, nilai residu, umur manfaat dan metode penyusutan di-reviu, dan jika sesuai dengan keadaan, disesuaikan secara prospektif.

Hak atas tanah dinyatakan sebesar nilai perolehan dan tidak disusutkan.

Aset dalam penyelesaian dinyatakan sebesar biaya perolehan dan disajikan sebagai bagian dari "Aset Tetap" dalam laporan posisi keuangan konsolidasian. Akumulasi biaya perolehan akan dipindahkan ke masing-masing akun aset tetap yang bersangkutan pada saat aset tersebut selesai dikerjakan dan siap digunakan.

At the end of each reporting period, the assets' residual values, useful lives and method of depreciation are reviewed, and if appropriate, adjusted prospectively.

Land rights are stated at cost and are not depreciated.

Construction-in-progress is stated at cost and presented as part of "Fixed Assets" in the consolidated statement of financial position. The accumulated costs will be reclassified to the appropriate fixed assets account when construction is completed and the assets are ready for their intended use.

2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

Beban perbaikan dan pemeliharaan dibebankan pada laba atau rugi pada saat terjadinya; biaya yang penggantian atau inspeksi signifikan dikapitalisasi pada saat terjadinya dan jika besar kemungkinan manfaat ekonomis di masa depan berkenaan dengan aset tersebut akan mengalir ke Kelompok Usaha, dan biaya perolehan aset dapat diukur secara andal. Aset tetap dihentikan pengakuannya pada saat dilepaskan atau ketika tidak ada manfaat ekonomis masa depan yang diharapkan dari penggunaan atau pelepasannya. Laba atau rugi yang timbul dari penghentian pengakuan aset dimasukkan dalam laporan laba rugi komprehensif konsolidasian pada tahun aset tersebut dihentikan pengakuannya.

#### n. Goodwill

Goodwill yang timbul dari kombinasi bisnis diakui sebagai aset pada tanggal diperolehnya pengendalian (tanggal akuisisi). Goodwill diukur sebagai selisih dari imbalan yang dialihkan, jumlah setiap kepentingan nonpengendali pada pihak yang diakuisisi dan nilai wajar dari kepentingan ekuitas yang sebelumnya dimiliki pihak pengakuisisi pada pihak yang diakuisisi (jika ada) atas jumlah selisih bersih dari aset teridentifikasi yang diperoleh dan liabilitas yang diambil alih pada tanggal akuisisi.

Untuk tujuan uji penurunan nilai, goodwill dialokasikan pada setiap unit penghasil kas dari Kelompok Usaha yang diharapkan memberikan manfaat dari sinergi kombinasi bisnis tersebut. Unit penghasil kas yang telah memperoleh alokasi goodwill diuji penurunan nilainya secara tahunan. dan ketika terdapat indikasi bahwa unit tersebut mengalami penurunan nilai. Jika jumlah terpulihkan dari unit penghasil kas kurang dari jumlah tercatatnya, rugi penurunan nilai dialokasikan pertama untuk mengurangi jumlah tercatat aset atas setiap goodwill yang dialokasikan pada unit dan selanjutnya ke aset lainnya dari unit dibagi prorata atas dasar jumlah tercatat setiap aset dalam unit tersebut. Rugi penurunan nilai yang diakui atas goodwill tidak dapat dibalik pada periode berikutnya.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The cost of repairs and maintenance is charged to profit or loss as incurred; replacement or major inspection costs are capitalized when incurred if it is probable that future economic benefits associated with the costs will flow to the Group and the cost of the item can be reliably measured. An item of fixed assets is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of fixed assets is included in the consolidated statement of comprehensive income in the year the assets are derecognized.

#### n. Goodwill

Goodwill arising in a business combination is recognized as an asset at the date that control is acquired (the acquisition date). Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any noncontrolling interest in the acquiree and the fair value of the acquirer's previously held equity interest (if any) in the entity over net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units expected to benefit from the synergies of the combination. Cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognized for goodwill is not reversed in subsequent periods.

#### o. Penurunan Nilai Aset Non-Keuangan

Pada setiap tanggal pelaporan, Kelompok Usaha menilai apakah terdapat indikasi aset mengalami penurunan nilai. Jika terdapat indikasi tersebut, atau jika uji penurunan nilai secara tahunan disyaratkan untuk aset tertentu, maka Kelompok Usaha mengestimasi jumlah terpulihkan aset tersebut.

Jumlah terpulihkan suatu aset atau unit penghasil kas adalah jumlah yang lebih tinggi antara nilai wajar dikurangi biaya untuk menjual dan nilai pakainya. Jika jumlah terpulihkan suatu aset lebih kecil dari nilai tercatatnya, nilai tercatat aset harus diturunkan menjadi sebesar jumlah terpulihkan. Rugi penurunan nilai dan pemulihan rugi penurunan nilai diakui segera dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Penilaian dilakukan pada setiap akhir tahun pelaporan apakah terdapat indikasi bahwa rugi penurunan nilai yang telah diakui dalam tahun sebelumnya untuk aset selain Goodwill mungkin tidak ada lagi atau mungkin telah menurun. Jika indikasi dimaksud ditemukan, maka entitas mengestimasi jumlah terpulihkan aset tersebut.

Kerugian penurunan nilai yang telah diakui dalam tahun sebelumnya untuk aset selain Goodwill dibalik hanya jika terdapat perubahan asumsi-asumsi yang digunakan untuk menentukan jumlah terpulihkan aset tersebut sejak rugi penurunan nilai terakhir diakui. Dalam hal ini, jumlah tercatat aset dinaikkan ke jumlah terpulihkannya. Pembalikan tersebut dibatasi sehingga jumlah tercatat aset tidak melebihi jumlah terpulihkannya maupun jumlah tercatat, setelah dikurangi penyusutan, seandainya tidak ada rugi penurunan nilai yang telah diakui untuk aset tersebut pada tahun sebelumnya. Pembalikan rugi penurunan nilai diakui dalam laba rugi. Setelah pembalikan tersebut, penyusutan aset tersebut disesuaikan di tahun mendatang untuk mengalokasikan jumlah tercatat aset yang direvisi, dikurangi nilai sisanya, dengan dasar yang sistematis selama sisa umur manfaatnya.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

## o. Impairment of Non-Financial Assets

The Group evaluates at each reporting date, whether there is any indication that an asset may be impaired. If any such indication exists, or when annual impairment testing is required for certain assets, the Group estimates the recoverable amount of the asset.

The recoverable amount of an asset or a cashgenerating unit is the higher of its fair value less costs to sell and its value in use. Whenever the carrying amount of an asset exceeds its recoverable amount, the asset is considered to be impaired and is written down to its recoverable amount. Impairment loss and reversal of an impairment loss are recognized immediately in the consolidated statement of profit or loss and other comprehensive income.

An assessment is made at each annual reporting period as to whether there is any indication that previously recognized impairment losses recognized for an asset other than goodwill may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated.

A previously recognized impairment loss for an asset other than goodwill is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Reversal of an impairment loss is recognized in the profit or loss. After such a reversal, the depreciation charge on the said asset is adjusted in future years to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

## 2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

#### p. Sewa

Sewa yang mengalihkan secara substansial semua risiko dan manfaat yang terkait dengan kepemilikan aset kepada lessee diklasifikasikan sebagai sewa pembiayaan. Pada awal masa sewa, pembiayaan dikapitalisasi sebesar nilai wajar aset sewaan atau sebesar nilai kini dari pembayaran sewa minimum, jika nilai kini lebih rendah dari nilai wajar. Pembayaran sewa minimum dipisahkan antara bagian yang merupakan beban keuangan dan bagian yang merupakan pelunasan liabilitas sehingga menghasilkan suatu tingkat bunga periodik yang konstan atas saldo liabilitas. Beban keuangan dibebankan pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian. Aset sewaan yang dimiliki oleh lessee dengan dasar sewa pembiayaan dicatat pada akun aset tetap dan disusutkan sepanjang masa manfaat dari aset sewaan tersebut atau periode masa sewa, mana yang lebih pendek, jika tidak ada kepastian yang memadai bahwa lessee akan mendapatkan hak kepemilikan pada akhir masa sewa.

Dalam hal transaksi jual dan sewa-balik merupakan sewa pembiayaan maka transaksi tersebut harus diperlakukan sebagai dua transaksi yang terpisah yaitu transaksi penjualan dan transaksi sewa. Selisih lebih hasil penjualan dari nilai tercatat ditangguhkan dan diamortisasi selama masa sewa.

Sewa yang tidak mengalihkan secara substansial seluruh risiko dan manfaat yang terkait dengan kepemilikan aset diklasifikasikan sebagai sewa operasi.

#### q. Pengakuan Pendapatan dan Beban

Pendapatan diakui bila besar kemungkinan manfaat ekonomi akan diperoleh Kelompok Usaha dan jumlahnya dapat diukur secara handal. Pendapatan diukur pada nilai wajar imbalan yang diterima, tidak termasuk diskon, rabat dan pajak penjualan (PPN).

Pendapatan iklan diakui pada saat iklan yang bersangkutan ditayangkan.

Penjualan materi program diakui pada saat penyerahan materi kepada pelanggan atau pada saat produksi selesai, sesuai dengan keadaannya, berdasarkan syarat dalam perjanjian tersebut. PT VISI MEDIA ASIA Tbk

#### p. Leases

Leases that transfer substantially all the risks and benefits incidental to ownership of the leased item to the lessee are classified as finance leases. Finance leases are capitalized at the inception of the lease at the fair value of the leased assets or at the present value of the minimum lease payments if the present value is lower than the fair value. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recorded in the consolidated statement of profit or loss and other comprehensive income. Leased assets held by the lessee under finance leases are included in fixed assets and depreciated over the estimated useful life of the assets or the lease term, whichever is shorter, if there is no reasonable certainty that lessee will obtain ownership by the end of the lease term.

In the case of sale and leaseback that results in a finance lease, this is to be treated as two separated transactions, i.e. sale and lease. The excess of sales proceeds over the carrying amount is deferred and amortized over the lease term.

Leases that do not transfer substantially all the risks and benefits incidental to ownership of the leased item are classified as operating leases.

#### q. Revenue and Expense Recognition

Revenue is recognized to the extent it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding discounts, rebates and valueadded taxes (VAT).

Advertisement revenue is recognized when the advertisement is aired.

Sale of program materials is recognized upon delivery of materials to customers or upon completion of production, as the case may be, in accordance with the terms of the related agreements.

Uang muka yang diterima dari pelanggan dicatat sebagai "Uang Muka Pelanggan" pada laporan posisi keuangan konsolidasian .

Beban diakui pada saat terjadinya (metode akrual).

## r. Imbalan Kerja

lain)

Kelompok Usaha menentukan liabilitas imbalan kerja sesuai dengan Undang-undang Ketenagakerjaan No. 13/2003 ("Undang-undang") tanggal 25 Maret 2003

Perhitungan nilai kini kewajiban imbalan pasti, beban jasa kini dan imbalan kerja jangka panjang lainnya ditentukan dengan menggunakan metode Projected Unit Credit. Jumlah diakui sebagai liabilitas untuk imbalan kerja jangka panjang lainnya di laporan posisi keuangan konsolidasian interim adalah nilai kini kewajiban imbalan pasti.

Nilai kini liabilitas imbalan pasti ditentukan dengan mendiskontokan estimasi arus kas di masa depan dengan menggunakan tingkat bunga obligasi pemerintah jangka panjang pada akhir periode pelaporan dalam mata uang Rupiah sesuai dengan mata uang di mana imbalan tersebut akan dibayarkan dan yang memiliki jangka waktu yang sesuai dengan liabilitas imbalan pensiunan yang bersangkutan.

Pengukuran kembali yang timbul dari penyesuaian dan perubahan dalam asumsi-asumsi aktuarial langsung diakui seluruhnya melalui penghasilan komprehensif lainnya.

Biaya jasa lalu yang timbul dari amandemen atau kurtailmen program diakui sebagai beban dalam laba rugi pada saat terjadinya.

## s. Pajak Penghasilan

Kelompok Usaha menerapkan PSAK No. 46 (Revisi 2014) tentang "Pajak Penghasilan". PSAK ini memberikan tambahan penjelasan untuk aset dan liabilitas pajak tangguhan yang berasal dari aset yang tidak disusutkan yang diukur dengan menggunakan model revaluasi, dan properti investasi yang diukur dengan menggunakan model nilai wajar. PSAK ini juga tidak lagi mengatur mengenai tentang pajak final. Penerapan PSAK yang direvisi tersebut tidak memberikan pengaruh yang berarti terhadap laporan keuangan konsolidasian interim.

Advances received from customers are recorded as "Advance Receipts from Customers" in the consolidated statement of financial position.

Expenses are recognized when incurred (accrual basis).

### r. Employee Benefits

The Group determines its employee benefits liability under the Labor Law No. 13/2003 dated March 25, 2003 ("the Law").

The present value of defined benefit obligation, current service cost and cost of providing other long-term benefits is determined using the Projected Unit Method. The provsion for long-term employee benefits recognized in the interim consolidated financial statements of financial position represents the present value of the defined benefits obligation.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using the yield at the end of the reporting period of longterm government bonds denominated in Rupiah in which the benfits will be paid and that have terms to maturity similar to the related pension obligation.

Remeasurements arising from experience adjustments and changes in actuarial assumptions are directly recognized in other comprehensive income.

Past service cost arising from amendement or curtailment programs are recognized as expense in profit or loss when incurred.

#### s. Income Taxes

The Group has applied PSAK No. 46 (Revised 2014), "Income Taxes". This PSAK provides additional discussion on deferred tax asset or deferred tax liability arising from a non-depreciable asset measured using the revaluation model, and from investment property that is measured using the fair value model. This PSAK also removes the criteria of final tax. The adoption of this revised PSAK did not have significant impact on the interim consolidated financial statements.

Beban pajak kini ditetapkan berdasarkan taksiran laba kena pajak periode berjalan.

Aset pajak kini dan liabilitas pajak kini dilakukan saling hapus jika dan hanya jika entitas memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus jumlah yang diakui, dan bermaksud untuk menyelesaikan dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan.

Aset dan liabilitas pajak tangguhan diakui atas perbedaan temporer antara aset dan liabilitas untuk tujuan komersial dan untuk tujuan perpajakan setiap tanggal pelaporan. Manfaat pajak di masa mendatang, seperti saldo rugi fiskal yang belum digunakan, diakui sejauh besar kemungkinan realisasi atas manfaat pajak tersebut.

Aset dan liabilitas pajak tangguhan diukur pada tarif pajak yang diharapkan akan digunakan pada periode ketika aset direalisasi atau ketika liabilitas dilunasi berdasarkan tarif pajak (dan peraturan perpajakan) yang berlaku atau secara substansial telah diberlakukan pada akhir periode pelaporan.

Aset pajak tangguhan dan liabilitas pajak tangguhan dilakukan saling hapus jika dan hanya jika entitas memiliki hak secara hukum untuk saling hapus aset pajak kini terhadap liabilitas pajak kini, dan aset pajak tangguhan dan liabilitas pajak tangguhan terkait dengan pajak penghasilan yang dikenakan oleh otoritas perpajakan atas entitas kena pajak, yang sama atau entitas kena pajak berbeda yang bermaksud untuk memulihkan aset dan liabilitas pajak kini dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan, pada setiap periode masa depan yang mana jumlah signifikan atas aset atau liabilitas pajak tangguhan diharapkan diselesaikan atau dipulihkan.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Current tax expense is provided based on the estimated taxable income for the period.

Current tax assets and current tax liabilities are offset if, and only if, the entity has a legally enforceable right to set off the recognized amounts, and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred tax assets and liabilities are recognized for temporary differences between the financial and the tax bases of assets and liabilities at each reporting date. Future tax benefits, such as the carryforward of unused tax losses, are also recognized to the extent that realization of such benefits is probable.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the end of reporting period.

Deferred tax assets and deferred tax liabilities are offset if, and only if, the entity has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity, or different taxable entities that intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Additional tax principal and penalty amounts based on Tax Assessment Letters ("SKP") are recognized as income or expense in the current period/ year profit or loss. However, when further avenue is sought, such amounts are deferred if they meet the asset recognition criteria.

Dalam hal ini pengambil keputusan operasional yang mengambil keputusan strategis adalah Direksi.

### v. Provisi dan Kontinjensi

Provisi diakui jika Kelompok Usaha memiliki kewajiban kini (baik bersifat hukum maupun bersifat konstruktif) yang akibat peristiwa masa lalu besar kemungkinannya penyelesaian kewajiban tersebut mengakibatkan arus keluar sumber daya yang mengandung manfaat ekonomi dan estimasi yang andal mengenai jumlah kewajiban tersebut dapat dibuat.

Provisi ditelaah pada setiap tanggal pelaporan dan disesuaikan untuk mencerminkan estimasi kini terbaik. Jika tidak terdapat kemungkinan arus keluar sumber daya yang mengandung manfaat ekonomi untuk menyelesaikan kewajiban tersebut, provisi tidak diakui.

Liabilitas kontinjensi tidak diakui dalam laporan konsolidasian keuangan interim. Liabilitas kontinjensi diungkapkan dalam laporan keuangan konsolidasian interim, kecuali arus keluar sumber daya yang mengandung manfaat ekonomi kemungkinannya kecil. Aset kontinjensi diungkapkan dalam laporan keuangan konsolidasian interim, jika terdapat kemungkinan besar arus masuk manfaat ekonomis akan diperoleh.

## v. Provisions and Contingencies

Provisions are recognized when the Group has a present obligation (legal or constructive) where, as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

Contingent liabilities are not recognized in the interim consolidated financial statements. Contingent liabilities are disclosed in the interim consolidated financial statements, unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are disclosed in the interim consolidated financial statements where an inflow of economic benefits is probable.

Penyusunan laporan keuangan sesuai dengan Standar Akuntansi Keuangan di Indonesia mewajibkan manajemen untuk membuat pertimbangan, estimasi dan asumsi yang mempengaruhi jumlah-jumlah yang dilaporkan dalam laporan keuangan. Sehubungan dengan adanya ketidakpastian yang melekat dalam membuat estimasi, hasil sebenarnya yang dilaporkan di masa mendatang dapat berbeda dengan jumlah estimasi yang dibuat.

Kelompok Usaha mendasarkan asumsi dan estimasi pada parameter yang tersedia pada saat laporan keuangan konsolidasian disusun. Asumsi dan situasi mengenai perkembangan masa depan mungkin berubah akibat perubahan pasar atau situasi diluar kendali Kelompok Usaha. Perubahan tersebut dicerminkan dalam asumsi terkait pada saat terjadinya.

Pertimbangan, estimasi dan asumsi berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Kelompok Usaha yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian interim:

The preparation of financial statements in conformity with Indonesian Financial Accounting Standards, requires management to make judgments, estimations and assumptions that affect amounts reported therein. Due to the inherent uncertainty in making estimates, actual results reported in future periods may differ from those estimates.

The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions as they occur.

The following judgments, estimates and assumptions made by management in the process of applying the Group's accounting policies are those most likely to have significant effects on the amounts recognized in the consolidated financial statements:

# 2. IKHTISAR KEBIJAKAN AKUNTANSI PENTING (Lanjutan)

#### Menentukan klasifikasi aset dan liabilitas keuangan

Kelompok Usaha menetapkan klasifikasi atas aset dan liabilitas tertentu sebagai aset keuangan dan liabilitas keuangan dengan mempertimbangkan apakah definisi yang ditetapkan PSAK No. 55 dipenuhi. Dengan demikian, aset keuangan dan liabilitas keuangan diakui sesuai dengan kebijakan akuntansi Kelompok Usaha. seperti diungkapkan pada Catatan 2f.

## Menentukan nilai wajar dan perhitungan amortisasi biaya perolehan dari instrumen keuangan

Kelompok Usaha mencatat aset dan liabilitas keuangan tertentu pada nilai wajar dan pada biaya perolehan yang diamortisasi, yang mengharuskan penggunaan estimasi akuntansi. Sementara komponen signifikan atas pengukuran nilai wajar dan asumsi yang digunakan dalam perhitungan amortisasi biaya perolehan ditentukan menggunakan bukti obyektif yang dapat diverifikasi, jumlah nilai wajar atau amortisasi dapat berbeda bila Kelompok Usaha menggunakan metodologi penilaian atau asumsi yang berbeda. Perubahan tersebut dapat mempengaruhi secara langsung laba atau rugi Kelompok Usaha (Catatan 31).

## Menilai jumlah terpulihkan dari aset keuangan

Kelompok Usaha mengevaluasi akun piutang tertentu yang diketahui bahwa pelanggan tertentu tidak dapat memenuhi kewajiban keuangannya. Dalam hal tersebut, Kelompok Usaha menggunakan pertimbangan, berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas pada, jangka waktu hubungan dengan pelanggan dan status kredit dari pelanggan berdasarkan catatan kredit dari pihak ketiga yang tersedia dan faktor pasar yang telah diketahui, untuk mencatat penyisihan spesifik atas pelanggan terhadap iumlah terutang guna mengurangi iumlah piutang yang diharapkan dapat diterima oleh Kelompok Usaha. Penyisihan spesifik ini dievaluasi kembali dan disesuaikan jika tambahan informasi yang diterima mempengaruhi jumlah penyisihan atas penurunan nilai piutang (Catatan 6 dan 7).

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

## <u>Determining classification of financial assets and</u> financial liabilities

The Group determines the classifications of certain assets and liabilities as financial assets and financial liabilities by judging if they meet the definition set forth in PSAK No. 55. Accordingly, the financial assets and financial liabilities are accounted for in accordance with the Group's accounting policies disclosed in Note 2f.

## <u>Determining fair value and calculation of cost</u> <u>amortization of financial instruments</u>

The Group records certain financial assets and liabilities at fair values and at amortized costs, which requires the use of accounting estimates. While significant components of fair value measurement and assumptions used in the calculation of cost amortization were determined using verifiable objective evidence, the fair value or amortization amount would differ if the Group utilized different valuation methodology or assumptions. Such changes would directly affect the Group's profit or loss (Note 31).

## Assessing recoverable amount of financial assets

The Group evaluates specific accounts receivable where it has information that certain customers are unable to meet their financial obligations. In these cases, the Group uses judgment, based on available facts and circumstances, including but not limited to, the length of its relationship with the customer and the customer's current credit status based on any available third party credit reports and known market factors, to record specific provisions for customers against amounts due to reduce the receivable amounts that the Group expects to collect. These specific provisions are re-evaluated and adjusted as additional information received affects the provision for impairment (Notes 6 and 7).

## 3. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

Menentukan amortisasi persediaan materi program

Persediaan materi program dengan pembelian secara putus untuk program film, sinetron dan program serial, diamortisasi berdasarkan basis akselerasi selama jumlah penayangan yang diharapkan, sedangkan program dibawah perjanjian lisensi diamortisasi berdasarkan metode garis lurus selama periode lisensi atau berdasarkan jumlah penayangan, mana yang lebih dahulu. Amortisasi tersebut adalah secara umum diharapkan dalam industri dimana Kelompok Usaha menjalankan bisnisnya. Perubahan dalam belanja iklan, penjualan waktu tayang, peringkat, pangsa pemirsa dan perkembangan teknologi dapat mempengaruhi amortisasi persediaan materi program dan karenanya metode amortisasi tersebut di masa depan mungkin direvisi (Catatan 8).

## <u>Menentukan metode penyusutan dan estimasi umur</u> <u>manfaat aset tetap</u>

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen mengestimasi masa manfaat ekonomis aset tetap antara tiga (3) sampai dengan dua puluh (20) tahun. Ini adalah umur yang secara umum diharapkan dalam industri dimana Kelompok Usaha menjalankan bisnisnya. Perubahan tingkat pemakaian dan perkembangan teknologi dapat mempengaruhi masa manfaat ekonomis dan nilai sisa aset, dan karenanya biaya penyusutan masa depan mungkin direvisi (Catatan 2m dan 11).

## Menilai penyisihan aset keuangan tersedia untuk dijual

Kelompok Usaha menentukan bahwa investasi ekuitas aset keuangan AFS dinilai ketika ada penurunan yang signifikan atau penurunan jangka panjang pada nilai wajar dari investasi dibawah biaya perolehannya. Menentukan apakah terdapat penurunan yang signifikan atau penurunan jangka panjang memerlukan pertimbangan. Penurunan mungkin dapat terjadi ketika ada bukti kemunduran dalam kondisi keuangan *investee*, industri, dan kinerja dan operasional serta pendanaan arus kas (Catatan 13).

## 3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

<u>Determining amortization method of program material</u> inventories

Program material inventories for outright purchased programs such as film programs, sinetrons and series programs are amortized based on an accelerated basis over the number of expected telecasts, while programs under license arrangements are amortized based on the straight-line method over the periods of the related license or number of telecasts, whichever is earlier. The amortization practices are commonly applied in the industry in which the Group conducts its business. Changes in advertising expenditure, sale of airtime, rating, audience share and technological development could impact on the amortization method of program material inventories and therefore, the amortization method could be revised in the future (Note 8).

## <u>Determining depreciation method and estimated useful lives of fixed assets</u>

The costs of fixed assets are depreciated on a straightline basis over their estimated useful lives. Management properly estimates the useful lives of these fixed assets to be within three (3) to twenty (20) years. These are common life expectancies applied in the industry in which the Group conducts its business. Changes in the expected level of usage and technological development could impact on the useful economic lives and residual values of these assets, and therefore future depreciation charges could be revised (Notes 2m and 11).

## <u>Assessing impairment of available-for-sale financial assets</u>

The Group determines that an AFS equity investment is impaired where there has been a significant or prolonged decline in fair value below its cost. This determination of what is significant or prolonged requires judgment. Impairment may be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance and operational and financing cash flows (Note 13).

## 3. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

#### Alokasi harga beli dalam suatu kombinasi bisnis

Akuntansi akuisisi mensyaratkan penggunaan estimasi dan pertimbangan akuntansi untuk mengalokasikan harga perolehan terhadap nilai pasar wajar dari aset dan liabilitas yang teridentifikasi dari entitas yang diakuisisi. Setiap kelebihan dari harga perolehan atas nilai pasar wajar yang diestimasikan dari aset neto yang diakuisisi diakui sebagai *goodwill* dalam laporan posisi keuangan konsolidasian . Dengan demikian, pertimbangan yang dibuat dalam mengestimasi nilai pasar wajar yang diatribusikan ke aset dan liabilitas entitas yang diakuisisi dapat mempengaruhi kinerja keuangan Kelompok Usaha secara material.

#### Menilai penurunan nilai aset non-keuangan tertentu

Penyisihan keusangan materi program persediaan diestimasi berdasarkan fakta dan situasi yang tersedia, termasuk namun tidak terbatas kepada, kondisi fisik persediaan yang dimiliki, harga jual pasar, dan estimasi biaya penyelesaian. Provisi dievaluasi kembali dan disesuaikan jika terdapat tambahan informasi yang mempengaruhi jumlah yang diestimasi (Catatan 8).

Jumlah terpulihkan aset tetap dan *goodwill* didasarkan pada estimasi dan asumsi khususnya mengenai prospek pasar dan arus kas terkait dengan aset. Estimasi arus kas masa depan mencakup perkiraan mengenai pendapatan masa depan. Setiap perubahan dalam asumsi-asumsi ini mungkin memiliki dampak material terhadap pengukuran jumlah terpulihkan dan bisa mengakibatkan penyesuaian penyisihan penurunan nilai yang sudah dibukukan (Catatan 11 dan 12).

Pada tanggal 30 September 2016 dan 31 Desember 2015, Kelompok Usaha menilai bahwa tidak ada indikasi penurunan nilai persediaan materi program, uang muka pembelian peralatan, aset tetap, *goodwill* dan aset tidak lancar lainnya.

## 3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

#### Purchase price allocation in a business combination

Accounting for acquisitions requires extensive use of accounting estimates and judgments to allocate the purchase price to the fair market values of the acquiree's identifiable assets and liabilities at the acquisition date. Any excess in the purchase price over the estimated fair market values of the net assets acquired is recorded as goodwill in the consolidated financial statements. Thus, the numerous judgments made in estimating the fair market value to be assigned to the acquiree's assets and liabilities can materially affect the Group's financial performance.

#### Assessing impairment of certain non-financial assets

Allowance for obsolescence of program material inventories is estimated based on available facts and circumstances, including but not limited to, the inventories own physical condition, their market selling prices, and estimated costs of completion. The provisions are re-evaluated and adjusted as additional information received affects the amount estimated (Note 8).

The recoverable amounts of fixed assets and goodwill are based on estimates and assumptions regarding in particular the expected market outlook and future cash flows associated with the assets. Estimated future cash flows include estimates of future revenues. Any changes in these assumptions may have a material impact on the measurement of the recoverable amount and could result in adjustments to the provision of impairment already booked (Notes 11 and 12).

As of September 30, 2016 and December 31, 2015, the Group assessed that there was no indication of impairment of its program material inventories, advances for purchase of equipment, fixed assets, goodwill or other non-current assets.

## 3. ESTIMASI DAN PERTIMBANGAN AKUNTANSI YANG PENTING (Lanjutan)

#### Estimasi beban pensiun dan imbalan kerja

Penentuan liabilitas dan biaya pensiun dan liabilitas imbalan kerja Kelompok Usaha bergantung pada pemilihan asumsi yang digunakan dalam menghitung jumlah-jumlah tersebut. Asumsi tersebut termasuk antara lain, tingkat diskonto, tingkat kenaikan gaji tahunan, tingkat kecacatan, umur pensiun dan tingkat kematian. Sementara Kelompok Usaha berkeyakinan bahwa asumsi tersebut adalah wajar dan sesuai, perbedaan signifikan pada hasil aktual atau perubahan signifikan dalam asumsi yang ditetapkan Kelompok Usaha dapat mempengaruhi secara material liabilitas dan beban imbalan kerja (Catatan 21).

## Menentukan pajak penghasilan

Pertimbangan signifikan dilakukan dalam menentukan provisi atas pajak penghasilan badan. Terdapat transaksi dan perhitungan tertentu yang penentuan pajak akhirnya adalah tidak pasti sepanjang kegiatan usaha normal. Kelompok Usaha mengakui liabilitas atas pajak penghasilan badan berdasarkan estimasi apakah akan terdapat tambahan pajak penghasilan badan (Catatan 18).

Kelompok Usaha menelaah aset pajak tangguhan pada setiap tanggal pelaporan dan mengurangi nilai tercatat sepanjang tidak ada kemungkinan bahwa laba kena pajak memadai untuk mengkompensasi sebagian atau seluruh aset pajak tangguhan. Kelompok Usaha juga menelaah waktu yang diharapkan dan tarif pajak atas pemulihan perbedaan temporer dan menyesuaikan pengaruh atas pajak tangguhan yang sesuai (Catatan 18).

## Mengevaluasi provisi dan kontinjensi

Kelompok Usaha melakukan pertimbangan untuk membedakan antara provisi dan kontinjensi serta mempersiapkan provisi yang sesuai untuk proses hukum atau kewajiban konstruktif, jika ada, sesuai dengan kebijakan provisinya dan mempertimbangkan risiko dan ketidakpastian yang relevan.

## 3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (Continued)

#### Estimation of pension cost and employee benefits

The determination of the Group's liabilities and cost for pension and employee benefits is dependent on its selection of certain assumptions used in calculating such amounts. These assumptions include among others, discount rates, annual salary increase rate, disability rate, retirement age and mortality rate. While the Group believes that its assumptions are reasonable and appropriate, significant differences in the Group's actual results or significant changes in the Group's assumptions may materially affect its employee benefits liabilities and expenses (Note 21).

#### <u>Determining income taxes</u>

Significant judgment is involved in determining provision for corporate income tax. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognizes liabilities for expected corporate income tax issues based on estimates of whether additional corporate income tax will be due (Note 18).

The Group reviews its deferred tax assets at each reporting date and reduces the carrying amount to the extent it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be utilized. The Group also reviews the expected timing and tax rates upon reversal of temporary differences and adjusts the impact of deferred tax accordingly (Note 18).

## Evaluating provisions and contingencies

The Group exercises its judgment to distinguish between provisions and contingencies and sets up appropriate provisions for its legal and constructive obligations, if any, in accordance with its policies on provisions taking relevant risks and uncertainty into account.

Manajemen berpendapat bahwa persediaan materi program tidak perlu diasuransikan terhadap risiko kerugian atas kebakaran atau pencurian karena nilai wajar persediaan materi program tidak dapat diterapkan sebagai dasar untuk menentukan nilai pertanggungan asuransi dan bila terjadi kebakaran atau pencurian atas persediaan materi program yang dibeli, Entitas Anak dapat meminta penggantian dari distributor bersangkutan selama persediaan materi program tersebut belum ditayangkan dan belum habis masa berlakunya.

Management believes that the program material inventories do not need to be insured against risk of loss from fire or theft since the fair value of the program material inventories could not be established for purposes of insurance. If such risk occurs, the Subsidiaries can request replacement from the relevant distributor as long as the program material inventories have not yet been aired and have not yet expired.

### 32. INSTRUMEN KEUANGAN (Lanjutan)

Berdasarkan PSAK 60, "Instrumen Keuangan: Pengungkapan", terdapat tingkat hirarki nilai wajar sebagai berikut:

- (a) harga kuotasian (tidak disesuaikan) dalam pasar aktif untuk aset atau liabilitas yang identik (tingkat 1),
- (b) input selain harga kuotasian yang termasuk dalam tingkat 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung (misalnya harga) atau secara tidak langsung (misalnya derivasi dari harga) (tingkat 2), dan
- (c) input untuk aset atau liabilitas yang bukan berdasarkan data pasar yang dapat diobservasi (input yang tidak dapat diobservasi) (tingkat 3).

Metode dan asumsi berikut ini digunakan untuk mengestimasi nilai wajar untuk setiap kelompok instrumen keuangan sepanjang nilai tersebut dapat diestimasi:

Aset dan liabilitas keuangan jangka pendek:

a) Instrumen keuangan jangka pendek dengan jatuh tempo satu tahun atau kurang (kas dan setara kas, dana yang dibatasi penggunaannya, piutang usaha, piutang lain-lain, investasi jangka pendek, utang usaha, utang lain-lain dan beban masih harus dibayar).

Instrumen keuangan ini diperkirakan sebesar nilai tercatat mereka karena sebagian besar merupakan jangka pendek.

### b) Instrumen keuangan derivatif

Derivatif ini diukur pada nilai wajarnya dengan menggunakan teknik penilaian kuotasi harga pasar untuk instrumen tersebut (tingkat 2).

Aset dan liabilitas keuangan jangka panjang:

 a) Aset dan liabilitas keuangan jangka panjang dengan suku bunga tetap (pinjaman bank jangka panjang dan liabilitas pembiayaan konsumen).

Nilai wajar dari liabilitas keuangan ini ditentukan dengan mendiskontokan arus kas masa datang menggunakan suku bunga yang berlaku dari transaksi pasar yang dapat diamati untuk instrumen dengan persyaratan, risiko kredit dan jatuh tempo yang sama.

### 32. FINANCIAL INSTRUMENTS (Continued)

Based on PSAK 60, "Financial Instruments: Disclosures," there are levels of fair value hierarchy as follows:

- (a) quoted prices (unadjusted) on active markets for identical assets or liabilities (level 1),
- (b) inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from market prices) (level 2), and
- (c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to do so:

Short-term financial assets and liabilities:

a) Short-term financial instruments with remaining maturities of one year or less (cash and cash equivalents, restricted funds, trade receivables, other receivables, short-term investments, trade payables, other payables, and accrued expenses).

These financial instruments approximate to their carrying amounts largely due to their short-term maturities.

b) Derivative financial instruments

These derivatives are measured at their fair values using quoted market prices existing for such instruments (level 2).

Long-term financial assets and liabilities:

a) Long-term fixed-rate financial asset and liabilities (long-term bank loans and consumer finance liabilities).

The fair value of these financial liabilities is determined by discounting future cash flows using applicable rates from observable current market transactions for instruments with similar terms, credit risk and remaining maturities.

lain)

b) Aset dan liabilitas keuangan jangka panjang lainnya (piutang pihak berelasi, jaminan sewa, investasi pada entitas asosiasi dan utang pihak berelasi).

Estimasi nilai wajar didasarkan pada nilai diskonto dari arus kas masa datang yang disesuaikan untuk mencerminkan risiko pihak lawan (untuk aset keuangan) dan risiko kredit Kelompok Usaha (untuk liabilitas keuangan) dan menggunakan suku bunga bebas risiko (*risk-free rates*) dari instrumen yang serupa.

AFS yang tidak dikuotasi pada harga pasar dan nilai wajarnya tidak dapat diukur secara handal tanpa menimbulkan biaya yang berlebihan, dicatat berdasarkan nilai nominal dikurangi penurunan nilai (tingkat 3).

# 33. ASET DAN LIABILITAS MONETER DALAM MATA UANG ASING

Aset dan liabilitas moneter dalam mata uang asing adalah sebagai berikut:

### 32. FINANCIAL INSTRUMENTS (Continued)

c) Other long-term financial assets and liabilities (due from related parties, rental deposits, investment in associates and due to related parties).

Estimated fair value is based on the discounted value of future cash flows adjusted to reflect counterparty risk (for financial assets) and the Group's own credit risk (for financial liabilities) and using risk-free rates for similar instruments.

AFS that are not stated at quoted market price and whose fair value cannot be reliably measured without incurring excessive costs, are carried at their nominal amounts less any impairment losses (level 3).

### c. Risiko suku bunga

Kelompok Usaha sebagian didanai dengan utang dan pinjaman lainnya yang dikenai bunga (kecuali pinjaman antar pihak berelasi), seperti pinjaman jangka panjang dan pinjaman lainnya. Eksposur Kelompok Usaha tertentu terhadap risiko pasar untuk perubahan tingkat suku bunga terutama sehubungan dengan pinjaman serta aset dan liabilitas berbunga yang memiliki tingkat bunga mengambang. Kebijakan Kelompok Usaha adalah mendapatkan tingkat suku bunga yang paling menguntungkan tanpa meningkatkan ekposur terhadap mata uang asing, dengan mengendalikan beban bunga dengan membuat kombinasi utang dan pinjaman jangka panjang dengan tingkat suku bunga tetap dan mengambang. Kelompok Usaha mengelola risiko keuangan ini dengan melakukan monitor terhadap tingkat suku bunga pasar.

Berdasarkan estimasi manajemen, suku bunga Dolar AS mungkin meningkat/ menurun 50 basis poin dibandingkan tingkat bunga pada tanggal 30 September 2016 dan 31 Desember 2015.

### c. Interest rate risk

The Group is partly financed through interest-bearing borrowings (except affiliated company loan) such as long-term loans, and other borrowings. The Group's exposure to market risk for changes in interest rates relates primarily to its borrowing obligations and interest-bearing assets and liabilities, which are subject to variable interest rates. The Group's policies are to obtain the most favorable interest rates available without increasing its foreign currency exposure by managing its interest cost using a mixture of fixed and variable rate debts and long-term borrowings. The Group manages this financial risk by monitoring the market interest risk movement.

Based on management's estimate, the US Dollar interest rates may increase/ decrease by 50 basis points compared to the interest rate on September 30, 2016 and December 31, 2015.
